Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Kenya Methodist University's website is an established academic portal presenting certificate, diploma, degree, postgraduate, TVET, and professional programmes, together with admissions, governance, research, campus, student, staff, recruitment, tender, news, and event resources; its apparent purpose is to support the university's education services and institutional administration.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive financial claims, or malicious browser behaviours were observed. The consistent Kenya Methodist University identity, long-established domain, extensive historical continuity, clean external threat reputation, and academic `ac.ke` namespace provide mutually reinforcing evidence that the site is authentic rather than a recently created imitation.

- The homepage consistently identifies Kenya Methodist University and presents institution-specific faculties, governance bodies, campuses, academic resources, vacancies, tenders, and student and staff services.
- The domain was registered on 12 February 2003 and is approximately 23.48 years old.
- Web-archive records contain 3,968 snapshots spanning 16 December 2003 to 31 July 2026, representing 24 years of tracked history with no detected repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and no reported abuse associated with the hosting address.

Regulatory Verification Notes

The captured homepage provides a substantial institutional identity through governance, academic, quality-assurance, and administrative content. However, the supplied page evidence does not establish a specific accreditation, statutory registration, or licence reference; this is a limited disclosure-verification matter, not evidence of deception. No matching broker-reputation entry was identified, which is unsurprising for a university and carries no licensing implication.

- The homepage provides dedicated material for the Board of Trustees, University Council, University Management, Senate, Chancellor, Vice Chancellor, and quality-management functions.
- The site uses Kenya's academic `ac.ke` namespace, consistent with its stated university purpose.
- The domain registrar is Kenya Education Network, and the site is served from AS36914 by Kenya Education Network in Kenya.
- The site's transport encryption uses a valid DV TLS certificate issued by YE2, valid to 27 September 2026.

What to Verify Next

For formal reliance, institutional status and programme recognition should be confirmed directly with the relevant Kenyan education or professional registry, using the legal name and programme details shown by the university. Applicants, suppliers, and prospective employees should also confirm payment instructions, admissions correspondence, tender notices, and recruitment communications through independently obtained institutional channels before committing funds or sensitive documents.

- The homepage advertises multiple qualification levels and specialist schools, including medicine, pharmacy, health sciences, computing, business, education, and TVET.
- The site provides admissions, vacancies, tenders, campus information, and contact resources—areas in which independently confirming consequential instructions is appropriate.
- The homepage includes anonymous reporting and a university security-operations resource, providing institution-specific escalation routes for suspected misuse.

Summary Verdict

The website is legitimate, established, and trustworthy. Its institutional identity, mature public presence, coherent academic content, clean reputation, and stable historical provenance converge strongly, with no contradictory risk signals observed. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves to a single likely origin address operated by Kenya Education Network in Kenya. No CDN or WAF layer was detected; direct origin visibility is therefore part of the deployment architecture, but the available evidence identifies no associated abuse pattern or infrastructure-integrity concern.

Closing Assessment

Prospective users may engage with the site normally, applying routine institutional due diligence when acting on consequential admissions, employment, procurement, payment, or document-submission instructions.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [kemu.ac.ke](#).

- The request stayed on kemu.ac.ke. It was not redirected to another domain. CLEAR
- Registration is published under Kenya Education Network. CLEAR
- DNS for this domain is served by or.ke, across 3 name servers. NOTED
- The registration is paid up to 2026-12-31. NOTED
- The earliest public archive of this site is from 2003-12-16. CLEAR
- It is hosted on Kenya Education Network, from a server in KE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kemu.ac.ke at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
