

Is keymailer.co legit? TrustSniffer's high-trust assessment: 90/100

keymailer.co

Verdict

90

OUT OF 100

HIGH TRUST

keymailer.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Keymailer is an influencer marketing platform for games: marketplace-style SaaS connecting publishers and agencies with game creators. The page contains product marketing, testimonials, links to sign up/log in, and references to events and pricing.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Keymailer is a game-focused influencer-marketing SaaS platform that connects publishers and agencies with content creators, offering campaign-management tools, creator programs, publisher services, pricing information, and account registration.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, malicious-content, or confirmed abuse indicators. The homepage presents a coherent commercial model, with creator sign-up and login pathways, publisher and agency services, campaign tools, customer testimonials, and promotional claims that Keymailer provides games to 60,000 content creators reaching 2.4 billion viewers. Those audience figures are marketing claims rather than independently substantiated metrics in the supplied evidence, but they do not by themselves indicate deception. The site's established and continuous historical presence, together with clean external reputation checks and benign observed behavior, supports an apparently legitimate, low-risk assessment.

EVIDENCE

- The homepage describes Keymailer as an influencer-marketing platform for games and contains no detected phishing or brand-impersonation indicators.
- The homepage contains product descriptions, publisher and agency pathways, creator programs, testimonials, and sign-up/login links consistent with the stated SaaS business model.
- The domain was registered in 2015 and is approximately 11.21 years old.
- The site has 853 archive snapshots spanning 2015-10-27 to 2026-05-21, covering 12 tracked years.

Regulatory Verification Notes

The available content describes a commercial platform for game publishers, agencies, and creators rather than a financial or otherwise clearly regulated service. No license or registration number is presented in the supplied page material; this is a transparency item for ordinary business verification, not evidence of a scam. The real-world operator identity is not independently verified, so the site's apparent legitimacy should not be treated as proof of a specific legal entity. Registration through GoDaddy.com, LLC and the absence of a matched broker-reputation record provide contextual support, but neither establishes licensing or legal ownership.

EVIDENCE

- The homepage identifies the service as a game influencer-marketing platform and links to creator, publisher/developer, agency, pricing, and campaign functions.
- The supplied page content contains no licensing authority or registration number.
- Domain registration is recorded through GoDaddy.com, LLC, with an expiration date of 2027-05-27.
- The site's transport encryption uses a WE1-issued DV TLS certificate valid through 2026-10-09.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the contracting entity, review the applicable terms and commercial policies, and establish how refunds, campaign disputes, and payment protection are handled. Where a transaction or service arrangement falls within a regulated activity, the relevant regulator's public register should be checked for the independently identified entity. Official support and contact channels should also be confirmed through an independent route before sensitive account or payment matters are submitted.

EVIDENCE

- The homepage provides sign-up and login pathways but does not, in the supplied material, establish the legal identity of the contracting party.
- The homepage references pricing, publisher services, agency tools, and enterprise campaign management, making commercial terms and dispute handling relevant to onboarding.
- The site offers creator programs and campaign participation, so account permissions and payment responsibilities should be reviewed before activation.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. The classification is strong, while the operator's real-world identity remains independently unverified; legitimacy is therefore supported by converging evidence but is not proven as a legal-entity determination.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, with observed traffic terminating on Cloudflare edge servers rather than an identified origin. This reduces direct exposure of the underlying service infrastructure and is a mitigating security characteristic, not proof of operator legitimacy.

Closing Assessment

Ordinary independent checks of merchant identity, applicable policies, and payment protections should precede credential or payment interactions.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of keymailer.co.

- The request stayed on keymailer.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-27. NOTED
- The earliest public archive of this site is from 2015-10-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about keymailer.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
