Full analysis

Overview

This Arabic-language personal website is centered on Khaled Kheder and presents professional mental-health content alongside paid educational and consultative services, with an apparent business model based on public information, publications, training, and client consultations.

Scam/Impersonation Risk

No contradictions were observed: the available evidence identifies no phishing, impersonation, blacklist, or malicious-content signal. The homepage's presentation is consistent with a personal psychology and education service, including articles, books such as "Cognitive Behavioral Therapy for Sleep Problems," online consultations, and training programmes. Published counters—13,000 Facebook followers, 850 online courses, and 1,500 online consultations—are claims made by the site rather than independently validated metrics, but they do not, on the supplied evidence, constitute an impersonation or scam indicator. The site also showed no login form, sensitive form, hidden form, wallet connection, or credential-harvesting behaviour.

EVIDENCE

- The homepage presents the individual's name, psychology-related publications, consultation booking, and online/offline training services.
- The homepage contains no identified phishing or brand-impersonation indicators, and observed interaction testing found no login form, hidden form, or wallet-sensitive behaviour.
- External reputation checks recorded no malicious or suspicious detections and no abuse reports associated with the observed hosting address.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate professional-services website, but it does not independently verify the real-world operator's identity. The site's service presentation does not state a licensing authority or license number; for psychology-related consultations and training, this is a regulatory-transparency point requiring confirmation in the relevant jurisdiction rather than evidence of a scam. The domain uses privacy-protected registration through NameSilo, LLC, which is an administrative registration detail. No adverse broker-reputation match was identified.

EVIDENCE

- The domain was registered on 2022-07-23 and is approximately 4.08 years old; the registrar is NameSilo, LLC.
- The homepage and service content identify professional consultations and training but provide no stated license authority or license number in the supplied evidence.
- The supplied third-party broker dataset returned no match for the site or named individual.

What to Verify Next

Before credential or payment interactions, independently confirm the operator's professional identity, any psychology or counselling authorization applicable to the service location, the terms governing consultations and course purchases, and the availability of payment protections or refunds. Contact channels should be confirmed through an independent, trusted route rather than relying solely on details presented on the site.

EVIDENCE

- The homepage provides a consultation-booking route, making operator and service-provider confirmation directly relevant before a paid appointment.
- The site presents both educational products and professional consultations, so service terms and payment protections should be checked separately for each type of engagement.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. No contradictory signals were observed, although the real-world operator connection remains independently unverified.

Infrastructure Integrity

The website benefits from CDN/WAF protection, which mitigates direct exposure of the underlying service infrastructure. The observed edge infrastructure is hosted in Germany by Hetzner Online GmbH; this is a protective and operational signal, not proof of the operator’s identity.

EVIDENCE

- Served through AS24940, HETZNER-AS — Hetzner Online GmbH, DE; observed edge IP: 188.34.138.104.
- TLS uses issuer YR2 with DV validation and is valid to 2026-10-11T20:28:47+00:00.

Closing Assessment

Ordinary use is proportionate to the assessed posture, with independent identity, service-term, and payment-protection checks completed before credentials or payments are provided.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about khaledkheder.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
