

Is kimzeycasing.com a scam? TrustSniffer's high-risk assessment: 0/100

kimzeycasing.com

Verdict

0

OUT OF 100

CRITICAL RISK

kimzeycasing.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Chinese-language free streaming site listing TV series and films, with catalogue pages, playback links, and site navigation. Contact email, phone and an ICP number are present. No forms collecting sensitive information are visible in the provided DOM.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	13 flagged it VirusTotal	RISK

The page as captured

<https://kimzeycasing.com/>

What kimzeycasing.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

A Chinese-language free streaming and catalogue website presents television series, films, variety programming, and playback links for free online viewing. Its apparent business model is an ad-supported or affiliate-supported entertainment portal offering visitors immediate access to a large catalogue without a stated subscription charge.

Scam/Impersonation Risk

Confirmed external threat and blacklist signals materially outweigh the benign appearance of the captured homepage. Multiple external detections classify the domain as malicious or suspicious, including detections associated with Kaspersky and Sophos, and the domain is recorded on external blacklists. Historical intelligence also records a phishing-known indicator, although the captured page itself showed no login form, hidden form, brand impersonation, or sensitive-data collection. No legal-entity identity contradiction was observed across the supplied page evidence, but the combination of confirmed blacklist status, malicious detections, and unresolved provenance makes sensitive interaction inappropriate. The homepage's free

streaming proposition and apparently ordinary catalogue presentation do not neutralize those external indicators.

EVIDENCE

- External reputation telemetry recorded 13 malicious detections, 1 suspicious detection, and a confirmed blacklist condition; Kaspersky and Sophos were specifically flagged.
- Historical archive intelligence records the domain as first seen on 2008-12-01 and last seen on 2025-02-16, with 18 years tracked and an archive-reconciled domain age of 17.71663244353183 years.
- The homepage presents a content catalogue and playback navigation, while captured page analysis found no login form, hidden form, or external sensitive-data submission mechanism.
- The historical record contains a phishing-known indicator, while the captured page was not classified as showing brand impersonation.

Regulatory Verification Notes

The site provides About, service-support, contact, and copyright navigation and displays contact details and an ICP number. However, the supplied pages do not present a licensing authority, license number, or clear rights disclosure for the streamed films and programmes. This is a material transparency and regulatory-verification gap for a free streaming service, rather than by itself proof of fraud. The operator's real-world identity remains unverified, and the available third-party broker dataset contains no matching broker record.

EVIDENCE

- The homepage and linked site navigation expose About, service-support, contact, and copyright sections; the supplied content does not identify a licensing authority or license number.
- The current registration record lists GMO Internet Group, Inc. d/b/a Onamae.com as registrar and a creation date of 2026-07-19T18:34:14Z.
- The site is served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid to 2026-10-20T13:31:43+00:00.

What to Verify Next

Independent verification should precede any account, credential, payment, or other sensitive interaction. The stated operator should be matched to an independently obtained corporate identity, the ICP information should be checked through the relevant official Chinese registration channel, and the copyright and licensing position should be confirmed with rights holders or authoritative licensing records rather than relying solely on the site's own pages. Contact channels should also be confirmed through an independent route, and any browser warnings, redirects, downloads, or advertising destinations should be treated as grounds to stop the session.

EVIDENCE

- The site's navigation includes registration and login entry points, even though no sensitive form was visible in the captured DOM.
- The copyright page is present, but the supplied page evidence does not establish a corresponding licensing authority or verified rights claim.
- The contact and service-support pages provide the site's stated communication routes for independent comparison with external records.

Summary Verdict

The overall posture is **critical risk**, with sensitive interaction risk driven by confirmed external threat and blacklist indicators. The website may appear to be a conventional entertainment catalogue at the content layer, but the available evidence does not support treating it as a trusted destination for credentials, account access, payments, or other sensitive activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful defensive layer, but it is only a mitigating infrastructure signal and does not establish operator legitimacy. All observed addresses were Cloudflare edge infrastructure, with no origin candidate visible in the analysis; the identified hosting provider was CLOUDFLARENET - Cloudflare, Inc., US, on AS13335.

Closing Assessment

Restrict any necessary activity to passive, read-only browsing in an isolated environment, and do not proceed with login, credential submission, downloads, payments, or other sensitive actions unless the independent identity, rights position, and contact channels have been satisfactorily established.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kimzeycasing.com.

- The request stayed on kimzeycasing.com. It was not redirected to another domain. CLEAR
- Registration is published under GMO Internet Group, Inc. d/b/a Onamae.com. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-19. NOTED
- The earliest public archive of this site is from 2008-12-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kimzeycasing.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
