

# Is kingbokep.tv legit? TrustSniffer's high-trust assessment: 90/100

kingbokep.tv

## Verdict

90

OUT OF 100

HIGH TRUST

kingbokep.tv appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be

Unbranded Indonesian-language adult streaming site (KingBokep) listing many porn video titles and categories. Appears to offer free HD streaming/downloads; lacks verifiable legal identity or contact details and shows typical characteristics of ad-driven pirate porn portals.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

KingBokep is an Indonesian-language adult-content website presenting extensive categories of free video streaming and downloading, including Indonesian, Japanese, viral, and other pornography-related material. Its apparent business model is ad-supported traffic monetization rather than a clearly identified paid service.

### Scam/Impersonation Risk

No phishing, impersonation, malicious-reputation, or other direct contradiction was observed. The homepage presents a large catalogue of adult videos and claims free HD streaming and downloading, while the available content describes material as likely copyrighted and the browsing behavior is consistent with possible advertising redirects; these factors create content, rights-management, and browsing-safety concerns but do not establish a scam or impersonation operation. The site’s provenance is internally consistent, with no detected repurposing or semantic conflict.

EVIDENCE

- Homepage: Indonesian-language adult-streaming catalogue with approximately 405 listed pages and claims of free HD streaming and downloading.
- Homepage and browsing behavior: adult-content and likely-ad-redirect indicators were recorded; no login form, hidden form, wallet connection, or credential-submission mechanism was observed.
- Domain history: 34 archive snapshots spanning 2025–2026, tracking 2 years, with no detected suspicious repurposing.

### Regulatory Verification Notes

The available website content does not present a verifiable legal entity, operator address, licensing statement, or other formal ownership disclosure. This is a transparency and rights-management verification gap rather than evidence of fraud. The domain is registered through NAMECHEAP INC, and the wider technical and reputation signals are favorable: the site has a strong traffic footprint, no reported malicious findings in the supplied checks, and no matched third-party broker warning. Those signals support an established-site assessment but do not independently verify the real-world operator.

#### EVIDENCE

- Domain registration: Registered 2025-08-13T17:03:44Z; age 1 year; registrar NAMECHEAP INC; expiration 2027-08-13T17:03:44Z.
- Hosting telemetry: Served from AS60068 (CDN77 - Datacamp Limited, GB).
- Transport security: TLS certificate issued by YR2, validation level DV, valid to 2026-10-21T09:02:14+00:00.
- External presence: Traffic rank 1555; malicious findings 0; suspicious findings 0; abuse reports 0.

#### What to Verify Next

Before any credential or payment interaction, an independent check should establish who operates the service, whether the published content is lawfully distributed, and whether the relevant privacy, takedown, and user-protection arrangements are genuine. Contact and legal details should be corroborated through an independently sourced channel rather than relying solely on information presented on the site. Any future payment flow should be assessed for clear merchant identity, understandable terms, and payment-provider protections.

#### EVIDENCE

- Homepage: No clear product, legal identity, or verifiable contact details are presented in the supplied page content.
- Site interaction surface: No sensitive form, login form, wallet connection, or external password form was detected during observation.
- Business model: The page describes free, ad-supported adult streaming and downloading rather than a clearly documented paid service.

#### Summary Verdict

Available evidence supports a **high-trust, low-risk, apparently legitimate website classification**, and no scam or impersonation contradictions were observed. The classification concerns the site's technical and reputational posture; it does not independently prove the identity of the real-world operator.

#### Infrastructure Integrity

The website is protected by the CDN77 CDN/WAF, with observed edge infrastructure associated with AS60068 and no origin candidate identified in the supplied analysis. This mainstream edge protection is a mitigating infrastructure signal because it reduces direct origin exposure, but it is not proof of operator legitimacy.

#### Closing Assessment

Ordinary browsing may proceed in proportion to the site's content and applicable legal requirements, while independent operator, rights, and payment-protection checks should precede any submission of credentials or payment information.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of kingbokep.tv.

- The request stayed on kingbokep.tv. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NAMECHEAP INC. [CLEAR](#)
- DNS for this domain is served by bunny.net, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-08-13. [NOTED](#)
- The earliest public archive of this site is from 2025-08-13. [CLEAR](#)
- It is hosted on CDN77, from a server in GB. [NOTED](#)

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about kingbokep.tv at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
