

Is kiosgamer.co.id legit? TrustSniffer's high-trust assessment: 92/100

kiosgamer.co.id

Verdict

92
OUT OF 100

HIGH TRUST

kiosgamer.co.id appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 55%.

WHAT THIS SITE APPEARS TO BE

Indonesian Kiosgamer storefront offering official Garena game-credit top-ups, vouchers, memberships, and bundles with multiple local payment options. The page requests a player ID or platform login and proceeds to denomination and payment selection; no investment claims, crypto activity, or explicit phishing indicators appear in the provided text.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Indonesian ecommerce storefront for official Garena digital game products, allowing customers to purchase game currency, memberships, bundles, and redeemable vouchers through local banking, card, mobile-wallet, carrier, and retail payment channels.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or confirmed malicious reputation signals were observed. The homepage's request for a player ID or platform login is consistent with its disclosed game-credit fulfillment process: customers identify an account, select a denomination, and choose payment. Interactive testing found no hidden forms, credential submission to an untrusted destination, cloaking, clipboard manipulation, suspicious scripts, or cryptocurrency-wallet activity. The domain is long-established, has a meaningful global traffic footprint, and is clean across the evaluated major threat-intelligence sources, supporting the conclusion that this is a legitimate Garena storefront rather than an imitation.

- The homepage identifies the service as an official Garena top-up store and displays titles including Free Fire, Delta Force, Call of Duty: Mobile – Garena, Garena AOV, and Speed Drifters.
- The checkout form on the homepage has no untrusted destination; two completed interaction runs detected no hidden forms, external password forms, cloaking, wallet-drainer behavior, or clipboard hijacking.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no search-security warning or external threat listing; the domain is ranked 64,969 in the global traffic dataset.
- Domain-registration records show registration on 15 May 2017 (~9.22 years old) through PT Digital Registra Indonesia, with expiry on 15 May 2027.

Regulatory Verification Notes

The site presents itself as an ecommerce merchant for digital game credits, not as an investment, brokerage, banking, or cryptocurrency service. Its homepage provides access to terms and conditions, a privacy policy, an FAQ, and a help centre, while making no claim of financial licensing. The supplied material does not establish a separate operating-company registration or sector-specific authorization; for this business model, that is a disclosure-verification point rather than evidence of deception. No matching broker profile or adverse broker-reputation signal was identified.

- The homepage describes direct purchases and voucher redemption rather than deposits, investment returns, trading, lending, staking, or token activity.

- The homepage footer links to terms and conditions, a privacy policy, an FAQ, and a customer-help centre under a Garena Online copyright notice.
- The site's hosting infrastructure is served from AS58521, operated by GARENA-SG – Garena Online Pte Ltd in Singapore.
- The site's transport encryption uses a valid DV certificate issued by GeoTrust TLS RSA CA G1, valid until 20 December 2026.

What to Verify Next

Institutional onboarding should confirm the contracting entity and applicable Indonesian merchant registration from transactional documentation, then reconcile that identity with invoices, payment descriptors, and the governing terms. Payment teams should also validate official support channels independently and conduct an ordinary low-value test transaction before enabling material purchasing volume.

- The homepage exposes Indonesian payment methods including QRIS, ShopeePay, GoPay, DANA, bank transfer, cards, mobile carriers, Indomaret, and Alfamart, providing concrete channels whose merchant descriptors can be reconciled.
- The checkout flow requires account identification, denomination selection, and payment-method selection, supporting an end-to-end test of fulfilment and receipt records.
- The homepage provides help-centre and policy resources that can be compared with the legal identity shown during checkout and invoicing.

Summary Verdict

The website is legitimate, established, and trustworthy, with mutually reinforcing identity, operational, behavioral, and reputation evidence and no observed contradictions. Normal interaction—including account login, account actions, and standard purchases—is appropriate.

Infrastructure Integrity

The site resolves directly to a likely Garena-operated origin rather than through an identified CDN or WAF edge. Its resolved commercial hosting, valid encrypted transport, and coherent service ownership are mitigating integrity signals, although infrastructure protection alone is not proof of legitimacy.

Closing Assessment

Prospective customers may use the service normally, while institutional or high-volume engagement should follow standard vendor-onboarding and transaction-reconciliation controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kiosgamer.co.id.

- The request stayed on kiosgamer.co.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR
- DNS for this domain is served by awsdns-14.com, across 4 name servers. NOTED
- The registration is paid up to 2027-05-15. NOTED
- It is hosted on GARENA-SG, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kiosgamer.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
