

Is kjendy.al a scam? TrustSniffer's high-risk assessment: 0/100

kjendy.al

Verdict

0

OUT OF 100

CRITICAL RISK

kjendy.al shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

KJENDY is an Albanian distribution company website presenting company history, product categories, and a list of consumer brands they distribute. Contact emails and phone numbers are provided; content is informational and commercial (catalog/distributor). No signs of investment solicitation or credential harvesting.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What kjendy.al served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

KJENDY is an Albanian corporate distribution website presenting a company profile, business history, consumer-product categories, distributed brands, and contact channels. Its apparent business model is importing and wholesaling detergents, cosmetics, oral-care, and hygiene products to retailers or customers in Albania and neighbouring markets.

Scam/Impersonation Risk

The website content presents a conventional distributor profile and does not show investment solicitation, credential harvesting, login functionality, wallet interaction, or page-level brand impersonation. However, this benign presentation is materially contradicted by confirmed external blacklist coverage and multiple malicious detections, including detections from two tier-one security providers. These signals support a critical risk posture for sensitive interaction, regardless of the site's stated commercial purpose. No identity contradiction, phishing page, or direct impersonation finding was identified in the supplied page analysis, but the confirmed blacklist status remains the decisive concern.

EVIDENCE

- The homepage and company presentation describe KJENDY as a distributor founded in 2006, with consumer-product categories and brand information rather than financial or credential-related services.
- External reputation analysis recorded 15 malicious detections, including two tier-one provider detections.
- The domain was confirmed on two external blacklist sources; a security-response kill switch was active because malicious detections exceeded the critical threshold.

Regulatory Verification Notes

The available company and business presentation does not independently establish the real-world operator's identity, and no license or registration number is presented in the supplied business content. This is a regulatory and disclosure gap requiring independent confirmation, not a standalone determination of fraud. The site's stated activity—consumer-goods distribution—may not ordinarily require the type of financial licensing relevant to an investment platform, but the available material does not identify the applicable corporate registration or responsible legal entity. A valid domain-validated TLS certificate provides transport security only and does not validate the operator or business claims.

EVIDENCE

- Domain continuity is recorded as 6.368240930869268 years; the first recorded archive date is 2020-04-08T06:46:35Z and the last is 2025-03-04T21:23:14Z.
- Web-archive telemetry records 181 snapshots spanning 2020–2025, with 6 years tracked.
- Hosting resolves through AS209341, WHG-FRA - WHG Hosting Services Ltd, GB.
- TLS is issued by YR2 at DV validation level and is valid to 2026-10-06T14:11:29+00:00.

What to Verify Next

Before any commercial engagement, an independent party should confirm KJENDY's legal registration and trading status through the relevant Albanian corporate registry, obtain independently sourced confirmation of its physical business presence, and validate that any proposed supplier or payment instructions belong to the verified entity. Official contact channels should be confirmed through an offline or independently sourced route rather than relying solely on details published on the website. Given the external security findings, sensitive actions should remain suspended until those checks are completed and the domain's reputation has been reassessed.

EVIDENCE

- The About and contact material provides the business name, telephone details, and commercial purpose to compare against independent registry records.
- The available page analysis reports no login form, hidden sensitive form, password-external form, wallet-provider detection, or wallet-drainer activity.
- The site returned successfully in both observed browser runs, with no detected cloaking, clipboard hijacking, or suspicious inline scripts.

Summary Verdict

The overall posture is **critical sensitive-interaction risk**. The site's ordinary corporate presentation is insufficient to overcome the confirmed external threat detections and blacklist status, while independent operator identity remains unverified.

Infrastructure Integrity

The site resolves to a single likely origin address without a detected CDN or WAF layer. This provides no meaningful edge-based mitigation for direct-origin exposure; infrastructure stability and encrypted transport should therefore be treated as limited technical characteristics, not evidence of legitimacy.

EVIDENCE

- Infrastructure telemetry identifies one unique IP address, 85.187.143.252, with zero edge IPs and one likely origin IP.
- CDN detection is negative, and no infrastructure vendor was identified as providing CDN or WAF protection.

Closing Assessment

Prospective users should restrict activity to non-sensitive observation and refrain from login, credential submission, payment, or other financially consequential interaction unless independent identity, registration, and security-status checks produce satisfactory results.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kjendy.al.

- The request stayed on kjendy.al. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2020-04-08. CLEAR
- It is hosted on WHG-FRA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kjendy.al at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
