

Is kku.ac.th safe? TrustSniffer's moderate-trust assessment: 65/100

kku.ac.th

Verdict

65

OUT OF 100

MODERATE TRUST

kku.ac.th is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Official Khon Kaen University website content: institutional information, admissions, faculties, research, news and events, contact details and transparency resources.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is the public institutional site of Khon Kaen University (KKU), presenting information about the university's history, governance, faculties, academic programs, admissions, research, scholarships, campus life, news, events, and institutional contacts for prospective students, staff, researchers, and the wider community.

Scam/Impersonation Risk

No contradictions were observed. The homepage and institutional content consistently present a university information model, with no detected phishing, brand-impersonation, malicious, or sensitive-form indicators. Limited behavioral anomalies, including suspicious inline scripts and substantial DOM changes after interaction, were not accompanied by hidden forms, wallet activity, cloaking, clipboard manipulation, or non-whitelisted external submissions; they therefore do not establish an impersonation or scam pattern. External reputation checks recorded zero malicious and zero suspicious detections, and the site is within the globally ranked web population.

EVIDENCE

- The homepage identifies Khon Kaen University (KKU) and provides institutional sections covering history, administration, education, research, admissions, and campus services.
- The homepage behavior recorded no login form, hidden form, password submission to an external destination, wallet connection, wallet drainer, or clipboard-hijacking activity.
- External assessment recorded `vt\_malicious: 0`, `vt\_suspicious: 0`, `gsb\_malicious: false`, and `tranco\_rank: 12923`.

Regulatory Verification Notes

The site provides substantial institutional identity and governance content, including About KKU, History & Milestones, administration, university council information, offices and departments, admissions, and contact resources. The available evidence is consistent with an apparently legitimate academic institution, but independent operator identity verification remains incomplete; this is an administrative transparency limitation, not an identity contradiction. No financial-services license or registration number is claimed in the reviewed institutional material, which is a verification point rather than evidence of wrongdoing. The domain is registered through THNIC, and the transport certificate and hosting identity provide supporting technical consistency.

EVIDENCE

- The About KKU and Governance pages identify the institution and enumerate administrative bodies, committees, offices, and university leadership.
- The domain registrar is THNIC.
- The site is served from AS9546, identified as SNAKER-AS-AP - Ministry of University Affairs, TH.
- The site uses a TLS certificate issued by YE2 with DV validation, valid to `2026-10-30T07:44:26+00:00`.

What to Verify Next

Before a sensitive or high-value engagement, the prospective counterparty should confirm the relevant university office and payment destination through contact details obtained independently of the website. Admissions, scholarship, donation, employment, or research-related requests should be matched against the university's independently sourced institutional procedures, with any applicable authority or registration requirement confirmed directly with the responsible body. Routine informational use does not require the same level of counterparty validation.

EVIDENCE

- The site's institutional navigation separates admissions, international admissions, scholarships and financial aid, research funds, careers, and contact resources.
- The site identifies multiple governance and administrative units that can serve as independent points of institutional confirmation.
- No sensitive form or untrusted form destination was detected during the reviewed homepage interaction.

Summary Verdict

The overall posture is **moderate trust**. Available evidence supports a coherent, established-looking academic website with no observed scam or impersonation contradiction, while the real-world operator identity is not independently verified to a level that would justify treating the site as identity-proven for sensitive engagements.

Infrastructure Integrity

The site is not detected behind a mainstream CDN or WAF edge and resolves to two likely origin addresses, so it has less intermediary shielding than a heavily fronted service. A low-confidence DNS heuristic was described as fast-flux-like, but it is not corroborated by the site's clean threat indicators or by a confirmed abuse pattern.

Closing Assessment

Routine browsing and institutional information lookup are proportionate; sensitive submissions, payments, or other high-value actions should proceed only after the relevant counterparty and transaction details have been confirmed through an independently obtained channel.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kku.ac.th.

- The request stayed on kku.ac.th. It was not redirected to another domain. CLEAR
- Registration is published under THNIC. CLEAR
- DNS for this domain is served by ac.th, across 4 name servers. NOTED
- It is hosted on SNAKER-AS-AP, from a server in TH. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kku.ac.th at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
