

Is knightlinelegal.com safe? TrustSniffer's low-trust assessment: 30/100

knightlinelegal.com

Verdict

30

OUT OF 100

LOW TRUST

knightlinelegal.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Knightline Legal is an advertising/lead referral service that connects consumers with participating law firms for personal injury and related cases. The site promotes free consultations, a phone contact number, and contingency-based representation through partner firms. Content is marketing/lead focused rather than providing direct legal services.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What knightlinelegal.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Knightline Legal is a consumer-facing legal advertising and lead-referral website that connects visitors with participating law firms for personal-injury and related claims. It presents free consultations, contingency-based representation, telephone assistance, and an online case-intake form, while stating that it is an advertising group rather than a law firm itself.

Scam/Impersonation Risk

The site's stated business model is legal lead generation rather than direct legal representation, and its homepage presents claims such as "No Win, No Fee" and immediate access to injury attorneys. The content review found no apparent brand impersonation, login form, phishing form, or crypto-related mechanism; however, external reputation evidence records a confirmed **blacklist** condition and malicious detections associated with the domain. This contradiction outweighs the otherwise conventional presentation of the service

and creates a material risk for sensitive interaction, particularly where visitors may submit personal case information or rely on the site's legal-service claims.

EVIDENCE

- The homepage describes Knightline Legal as a “group advertising model” that connects consumers with participating law firms rather than as a law firm.
- The homepage promotes case intake, free consultations, contingency-based representation, and “No Win, No Fee” messaging.
- External reputation checks recorded 2 malicious detections and 1 suspicious detection; the domain was also recorded on external blacklist sources.

Regulatory Verification Notes

The available content does not independently verify the real-world operator behind the service. The site does not present a license, registration number, regulator, or clearly attributable legal entity for the advertising and referral operation; this is a regulatory and disclosure gap, not by itself proof of misconduct. The domain is long-established and registered through Moniker Online Services LLC, while its transport encryption is valid but uses domain validation only. These technical and registration signals provide operational context but do not resolve the unresolved legal-entity or referral-compliance questions.

EVIDENCE

- Domain registration: 2013-02-14T05:11:07Z; age 13.52 years; registrar Moniker Online Services LLC.
- Hosting identified as AS14061, DIGITALOCEAN-ASN – DigitalOcean, LLC, US.
- TLS certificate issued by YE2 with DV validation, valid to 2026-10-28T00:40:51+00:00.
- The homepage provides no license authority or license number for the advertising/referral operation.

What to Verify Next

Before any sensitive submission, an independent check should establish which participating law firm would receive a case, whether that firm is licensed in the relevant jurisdiction, and whether the referral arrangement and data-sharing practices are clearly documented. Any required legal-advertising or referral registration should be confirmed directly with the applicable state or professional regulator. Official contact channels should also be validated through an independent, offline source rather than relying solely on information presented on the site.

EVIDENCE

- The homepage contains a single contact-form and lead-capture workflow that should be assessed for the intended recipient and handling of submitted case information.
- The homepage requires JavaScript for some functions, so the complete intake and disclosure flow should be reviewed in a controlled browser session.
- The site publishes a telephone contact channel that can be independently verified before use.

Summary Verdict

The website presents a plausible legal-marketing service, but the available evidence supports a **low-trust posture with sensitive-interaction risk**. The confirmed external reputation contradictions and unverified

operator identity prevent the site from being treated as a dependable channel for personal, credential, or financial information.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the observed address is an edge address rather than an independently exposed origin. This provides a mitigating layer against direct infrastructure exposure, but protective hosting infrastructure does not establish the legitimacy of the operator or offset the external reputation findings.

EVIDENCE

- CDN/WAF protection was observed; 143.244.185.127 was identified as the sole observed edge IP, with 0 likely origin IP candidates.
- The observed edge address is associated with DigitalOcean infrastructure in the United States.

Closing Assessment

The appropriate posture is read-only review until the operator, participating counsel, regulatory standing, and data-handling arrangements have been independently confirmed; sensitive information and financial interactions should not be provided through the site in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of knightlinelegal.com.

- The request stayed on knightlinelegal.com. It was not redirected to another domain. CLEAR
- Registration is published under Moniker Online Services LLC. CLEAR
- DNS for this domain is served by hostgator.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-14. NOTED
- The earliest public archive of this site is from 2013-06-20. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about knightlinelegal.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
