Full analysis

Overview

Koji Store is a Brazilian Shopify fashion retailer presenting dresses and accessories for weddings, parties, and other special occasions through a direct-to-consumer online storefront with product purchasing, shipping, payment, and returns information.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage presents a coherent retail storefront with visible product information, pricing, customer-service channels, shipping terms, returns guidance, and physical-store references; observed behavior also showed no hidden forms, external posting, wallet activity, or cloaking. The available evidence therefore supports normal interaction with the site.

- Homepage: no detected phishing, brand-impersonation, or deceptive-content indicators.
- Storefront behavior: two successful runs with no external XHR activity, hidden sensitive forms, wallet connections, or clipboard manipulation.
- External reputation checks: zero malicious and zero suspicious detections, with no blacklist hit recorded.

Regulatory Verification Notes

The site operates as a conventional fashion retailer rather than a regulated financial service, so the absence of a displayed financial license is not itself anomalous. The available storefront content provides commercial and consumer-service information, while formal corporate or licensing details should be confirmed where relevant to procurement or regulated onboarding. The domain and technical history provide affirmative support for an established operating presence.

- Domain registration: 2020-01-28; age 6.52 years; expiration 2027-01-28.
- Web archive: 43 snapshots spanning 2021-09-26 to 2026-05-20, across 6 tracked years.
- Hosting: AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS: issued by YE1, domain-validated (DV), valid to 2026-09-28.

What to Verify Next

For formal commercial engagement, confirm the seller's current legal details and applicable consumer-protection obligations through the relevant Brazilian registry or procurement documentation. Independently confirm customer-service and returns channels before any material transaction.

- Storefront pages: product, shipping, payment, and returns information is present for direct review.
- Customer-service content: contact channels and physical-store references are provided.
- Business model: direct-to-consumer retail sales with ordinary payment and delivery arrangements.

Summary Verdict

Koji Store presents as a legitimate, established, and trustworthy ecommerce business with no observed contradictions or material abuse indicators. The evidence supports routine browsing, account login where offered, and standard purchasing activity.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic served through the Cloudflare edge rather than a directly exposed origin. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although it is not by itself proof of legitimacy.

Closing Assessment

Normal interaction and standard transactions are appropriate, subject to ordinary consumer checks proportionate to the value of the purchase.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kojistore.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
