Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Kolkataff.tv is a regional informational website presenting Kolkata Fatafat lottery and satta results, historical result tables, free tips, lucky-number guidance, user reviews, and prompts to download an app for faster updates. Its apparent business model is content publishing supported by advertising, app installations, and potentially promotional or affiliate activity.

Scam/Impersonation Risk

No contradictions were observed: external checks found no malicious or suspicious detections, no phishing or brand-impersonation indicators were identified, and the homepage did not present a login form, password-collection mechanism, or payment flow. The site's subject matter is gambling-related, and its claims include "FREE TIPS," "Super Fast" results, and language describing itself as an "official" and "No. 1" website; these are promotional assertions rather than evidence of an impersonation. Behavioral testing did identify two suspicious inline scripts and limited non-whitelisted network activity, but the observed behavior did not include hidden sensitive forms, wallet activity, clipboard hijacking, cloaking, or credential submission. These anomalies are therefore better treated as a contactless advertising or promotional-site consideration than as evidence of a scam. Evidence:

- Homepage: publishes current and historical Kolkata Fatafat results, tips, and app-download prompts without a login or password form.
- Homepage content: uses promotional "official," "No. 1," and "FREE TIPS" wording, with no separate brand-impersonation finding.
- Browser behavior: recorded 2 suspicious inline scripts, 15 external XHR requests, and 5 external posts; no hidden sensitive forms or wallet-related activity was detected.
- External reputation: 0 malicious and 0 suspicious detections were recorded, with 0 abuse reports for the observed network address.

Regulatory Verification Notes

The website should be understood as an informational lottery-results and gambling-content publisher rather than as a verified regulated financial or gaming operator. No license claim, licensing authority, or license number was identified in the supplied site analysis, creating a transparency gap for any activity that could extend beyond publishing results into betting, paid tips, app distribution, or promotional referrals. This does not establish fraud, and no third-party broker match or regulatory finding was supplied. The available evidence is consistent with an established website, while the real-world operator remains independently unverified. Evidence:

- Homepage: identifies the content category through Kolkata Fatafat results, satta-related tips, schedules, and historical tables; no licensing disclosure was identified.
- Domain registration: registered 2024-11-13 and currently 1.75 years old; registrar is NAMECHEAD INC.
- Hosting telemetry: served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- Transport security: TLS certificate issued by WE1 at DV validation level, valid to 2026-09-26T05:02:07+00:00.

What to Verify Next

Before any credential or payment interaction, an independent check should establish the operator’s legal name, confirm whether the relevant lottery or gaming activity requires authorization in the applicable jurisdiction, and verify any such authorization through the competent official registry. The app-download destination, advertised commercial relationships, refund or withdrawal terms, and payment-protection arrangements should also be reviewed independently rather than inferred from the homepage. Evidence:

- Homepage: contains an app-download prompt and promotional result content, making the destination and permissions of any offered application material to verify.
- Site disclosures: the supplied analysis identified no license number or licensing authority, so regulatory status should be confirmed through an official registry where applicable.
- Commercial terms: any paid service, referral, or transaction connected to the site should be checked for identifiable counterparties, clear terms, and payment protections before use.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** with no observed scam or impersonation contradiction. The site appears legitimate and established in its observed online function, but that conclusion does not independently verify the real-world operator’s identity.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful layer of traffic filtering and infrastructure resilience. All four observed addresses were CDN edge addresses on AS13335, and no origin candidate was identified in the infrastructure analysis; this is a mitigating technical characteristic, not proof of operator legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture, while independent merchant-identity, terms, and payment-protection checks should be completed before submitting credentials or making payments.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [kolkataff.tv](#).

- The request stayed on [kolkataff.tv](#). It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by [cloudflare.com](#), across 2 name servers. NOTED
- The registration is paid up to 2026-11-13. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [kolkataff.tv](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
