Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website presents Konnect Phone Repair and Mobile Repair as a local Lemon Grove, California electronics-repair and mobile-services business, offering repairs for phones, computers, tablets, and consoles alongside phone sales, SIM cards, accessories, and prepaid or postpaid plans.

Scam/Impersonation Risk

No contradictions were observed. The homepage describes a conventional local-service model, with repair services, product sales, telephony-plan resale, an address, telephone contact, opening hours, and customer testimonials rather than phishing, investment, cryptocurrency, or financial-yield activity. The site has no detected login or sensitive-data form, no observed brand-impersonation indicator, and no recorded malicious or suspicious reputation result among the evaluated checks. Historical continuity is consistent with an operating business rather than a newly created or suspiciously repurposed site.

EVIDENCE

- The homepage identifies “Konnnect Phone Repair and Mobile Repair” and describes phone, laptop, tablet, PS4, virus-removal, CCTV, phone-sales, SIM-card, and telephony-plan services.
- Domain registration records show registration on 2019-12-29 and an age of 6.65 years.
- Historical records contain 312 snapshots spanning 2021-03-04 through 2025-10-23, covering 5 years.
- The observed site behavior showed no login form, hidden form, external form submission, wallet activity, cloaking, or suspicious inline script.

Regulatory Verification Notes

The site’s apparent commercial activity is that of a local repair and retail business, not an entity presenting itself as a regulated financial firm. Its About and contact content provides a business description and local contact details, but the real-world operator identity is not independently verified. No license or registration number is claimed on the reviewed pages; this is a disclosure and verification gap rather than evidence of a scam. Domain registration uses PDR Ltd. d/b/a PublicDomainRegistry.com, with privacy registration shown as an administrative arrangement. The available external broker context produced no match.

EVIDENCE

- The About page describes the business as a one-stop electronics service and states that it carries multiple phone, television, and internet plans.
- The reviewed pages do not state a licensing authority or license number for the repair, retail, or plan-resale activities.
- The site is hosted on AS396982, GOOGLE-CLOUD-PLATFORM - Google LLC, US.
- Transport encryption uses a DV certificate issued by YR1, valid to 2026-09-21T02:08:41+00:00.

What to Verify Next

Before a payment or credential-related interaction, an independent source should confirm the merchant’s physical business identity and the relationship between the site and the operating shop. The applicable repair warranty, return, cancellation, and payment-protection terms should be obtained and retained, particularly for device purchases or telephony-plan commitments. Any plan-resale or carrier-related representation should be confirmed through the relevant carrier’s independent customer-service channel.

EVIDENCE

- The homepage provides the stated business description, location information, telephone contact, opening times, and customer testimonials for independent comparison.
- The Contact Us and Shop navigation identifies the site’s principal customer-interaction routes.
- The site’s stated service mix includes both repairs and commercial sales or plan-related services, making written transaction and after-sales terms material to verification.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated local-service purpose. The assessment does not independently prove the real-

world identity of the operator, so legitimacy should be understood as evidence-consistent rather than conclusively established.

Infrastructure Integrity

The site resolves through Google Cloud infrastructure without a detected CDN, edge-IP layer, or separate origin candidate. This is a conventional, technically resolved hosting posture and provides useful infrastructure context, but hosting arrangements alone do not establish business legitimacy.

EVIDENCE

- The site is served from one resolved IP address, 34.174.233.5, associated with AS396982 and GOOGLE-CLOUD-PLATFORM - Google LLC, US.
- The infrastructure record reports 1 unique IP, 0 edge IPs, 0 likely origin candidates, and no detected CDN.

Closing Assessment

Ordinary independent merchant-identity, transaction-policy, and payment-protection checks should be completed before credentials or payment details are submitted; subject to those routine checks, the site’s overall posture supports normal consideration for its advertised services.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of konnectrepairs.com.

- The request stayed on konnectrepairs.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by siteground.us, across 2 name servers. NOTED
- The registration is paid up to 2026-12-29. NOTED
- The earliest public archive of this site is from 2021-03-04. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about konnectedrepairs.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
