

Is krea.ai legit? TrustSniffer's high-trust assessment: 100/100

krea.ai

Verdict

100

OUT OF 100

HIGH TRUST

krea.ai appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-24 by automated analysis. Classification confidence 75%.

What this site appears to be

Krea product landing page describing an AI creative suite offering image, video, and 3D generation, highlighting models, speed, features, pricing tiers (free through enterprise), and links to docs, GitHub and community channels. Appears to be a conventional SaaS offering with subscription monetization.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Krea.ai is an AI creative software platform presenting image, video, and 3D generation tools, model access, enhancement features, developer resources, and subscription plans ranging from free access to enterprise arrangements. Its apparent business model is conventional SaaS monetization through subscriptions, compute-unit packs, and enterprise contracts.

Scam/Impersonation Risk

No scam, phishing, impersonation, or other identity contradictions were observed. The homepage presents a coherent product offering, including text-to-image, text-to-video, motion transfer, text-to-3D, upscaling, background removal, editing, and LoRA fine-tuning, with no detected credential-harvesting, external password forms, wallet-draining, cloaking, or clipboard-hijacking behavior. Some automated observations identified substantial third-party network activity, client-side DOM changes, and console errors; these are implementation-level signals that can occur in a feature-rich interactive application and were not accompanied by abuse indicators. A separate automated similarity indication referencing ea.com was not corroborated by the page content and does not constitute an impersonation finding. Overall, the available evidence is consistent with an established, apparently legitimate service.

EVIDENCE

- Domain registration records show creation on 2022-06-10, with an age of 4.21 years.
- Web-archive coverage records 413 snapshots spanning 2022–2026, with 5 years tracked.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist match; the recorded traffic rank was 24334 and within the top 1 million.
- Interactive testing completed 2 of 2 runs successfully; no hidden forms, external password forms, wallet-provider activity, wallet-drainer activity, cloaking, or clipboard writes were detected.

Regulatory Verification Notes

The site appears to operate as a software service rather than presenting itself as a regulated financial provider. The available content does not clearly establish the real-world legal operator, and no license claim or license number is disclosed in the supplied page material; this is a transparency and verification gap, not evidence of a scam. Domain registration uses GoDaddy.com, LLC, with privacy-protected registrant information, which is an administrative limitation. The site's established technical continuity, valid transport encryption, and coherent commercial presentation support an evidence-consistent legitimacy assessment, while operator identity remains independently unverified.

EVIDENCE

- The domain registrar is GoDaddy.com, LLC; the recorded registration expires on 2028-06-10.
- The site's TLS certificate is issued by YE2, uses Domain Validation (DV), and is valid to 2026-10-26.
- The homepage identifies a subscription SaaS model with Free, Basic, Pro, Max, Business, and Enterprise tiers, but the supplied content contains no license authority or license number.
- The site links to documentation, GitHub, and community channels including LinkedIn, Instagram, Reddit, and YouTube.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal operator through an official company registry and review the applicable terms, renewal conditions, cancellation process, refund policy, and payment-protection arrangements. The relevant support and account channels should be authenticated through independently sourced corporate or community profiles rather than relying solely on links encountered during an initial visit. Enterprise purchasers should also obtain contractual details covering data handling, service availability, and dispute resolution.

EVIDENCE

- The site navigation exposes separate pricing, sign-up, login, enterprise, documentation, and blog entry points.
- The homepage provides both free sign-up and paid subscription pathways, making billing, renewal, and cancellation terms directly relevant to procurement review.
- Developer and community references include GitHub and multiple established social platforms, providing independent channels for cross-checking official communications.

Summary Verdict

The overall posture is **high trust and low risk**. Available evidence is consistent with an established, apparently legitimate website, and no contradictory signals were identified; however, the real-world operator identity is not independently verified.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, and all observed addresses were CDN edge servers rather than identified origin infrastructure. This reduces direct exposure of the underlying host and is a mitigating security control, but it is not, by itself, proof of legitimacy.

EVIDENCE

- Hosted through AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Four observed addresses were identified as Cloudflare edge IPs, with 0 likely origin IPs.

Closing Assessment

Normal evaluation is reasonable, subject to completing independent merchant-identity, return-policy, and payment-protection checks before submitting credentials or making payments.

Written analysis generated 2026-08-24 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of krea.ai.

- The request stayed on krea.ai. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-10. CLEAR
- The earliest public archive of this site is from 2022-07-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about krea.ai at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
