Kristen Poborsky

You're Doing the Work of Five People

What kristenpoborsky.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is an apparently personal consulting and education site for Kristen Poborsky, presenting AI business systems, content-creation services, digital products, lead magnets, and calls for advisory or implementation engagements aimed at coaches, consultants, and course creators.

Scam/Impersonation Risk

The site's visible content is coherent and contains no detected brand-impersonation, phishing, or credential-harvesting indicators. However, the domain is subject to a confirmed external blacklist signal, creating a material contradiction that outweighs the otherwise professional presentation. Additional reputation telemetry recorded one malicious and one suspicious detection. Abuse reports were attributed to a shared WPEngine content-delivery IP rather than uniquely to the website; this limits attribution to the site itself but does not remove the broader sensitive-interaction concern. The site's identity is also not independently verified, so the on-page association with Kristen Poborsky should be treated as apparent rather than proven.

EVIDENCE

- The homepage presents a service-consulting model for AI business systems, with no detected phishing indicators or sensitive credential form.
- External reputation checks recorded a confirmed blacklist signal for the domain.
- Seventeen abuse reports were recorded against shared CDN IP 141.193.213.11, attributed to WPEngine, Inc. and classified as shared infrastructure.
- The domain was registered in 2013 and is approximately 13.56 years old; the registrar is GoDaddy.com, LLC.

Regulatory Verification Notes

The site presents consulting, implementation, educational, lead-generation, and paid digital-product activities rather than a clearly regulated financial service. No license, registration number, or licensing authority is claimed in the supplied site content, leaving the legal-entity and regulatory-disclosure position unclear. This is a verification gap, not by itself evidence of fraud. No matching third-party broker profile was identified, but that absence is not a licensing or legal-status determination. The long registration continuity and stable archival record provide provenance context, while the blacklist signal remains the decisive adverse factor for trust posture.

EVIDENCE

- The domain has 230 archive snapshots spanning 2013–2026, with 14 years tracked.
- The site is served from AS209242, identified as CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- The transport certificate was issued by YE1 with DV validation and is valid to 2026-10-01T12:30:18+00:00.
- The homepage contains service, contact, booking, lead-magnet, and purchase/checkout pathways, but no licensing disclosure is identified in the supplied content.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the operator's legal identity and any business registration or authorization applicable to the services being purchased. Contact details and booking or checkout destinations should be validated through an independently sourced channel rather than relying solely on the website. Any proposed payment should use a method with meaningful dispute and recovery protections, and credentials should not be submitted until the login destination and account relationship have been independently confirmed.

EVIDENCE

- The homepage exposes four form or transaction pathways: contact, booking, lead-magnet signup, and purchase/checkout.
- Automated interaction observed four non-whitelisted external POST requests, six external XHR requests, two console errors, and a maximum post-interaction DOM difference of 2,962.
- No password-bearing external form, hidden sensitive form, wallet connection, clipboard hijack, or cloaking behavior was detected.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The website has a credible-looking consulting presentation and substantial historical continuity, but the confirmed adverse reputation signal and unresolved independent identity connection prevent a trustworthy conclusion.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and provides a mitigating layer against direct exposure of the hosting environment. Observed delivery was edge-only, with no origin candidate identified; this supports infrastructure resilience but does not establish the legitimacy of the operator or content.

EVIDENCE

- Cloudflare edge delivery used 141.193.213.10 and 141.193.213.11, both associated with AS209242.
- The observed hosting organization was CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- The site's TLS certificate used DV validation rather than organization-validated identity assurance.

Closing Assessment

Until independent identity, authorization, and transaction-channel checks are completed, activity should remain limited to passive viewing; login, credential submission, and payment activity should not proceed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Signals weighed against the site

- AbuseIPDB: 17 reports on hosting IP 141.193.213.11 (WPEngine, Inc., Content Delivery Network), 38% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kristenpoborsky.com.

- The request stayed on kristenpoborsky.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-01-31. [NOTED](#)
- The earliest public archive of this site is from 2013-03-24. [CLEAR](#)
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kristenpoborsky.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
