The page as captured

<https://kshetrapati.info/>

What kshetrapati.info served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a corporate B2B presentation for Kshetrapati Industries Pvt. Ltd., positioning itself as an AI and data solutions provider offering artificial intelligence, machine learning, data engineering, cloud, DevOps, automation, and product-engineering services to enterprise clients.

Scam/Impersonation Risk

The site presents a conventional corporate profile and its pages do not show a login form, sensitive submission form, credential-harvesting behavior, or apparent brand impersonation. However, this benign presentation is materially outweighed by external malicious detections and a confirmed blacklist status. The resulting contradiction means the site should be treated as unsuitable for credentials, account access, financial transactions, or other sensitive interaction, even though the on-page content itself contains no stated scam indicators. No identity contradiction was observed because the available content does not present multiple conflicting legal-entity names.

EVIDENCE

- The homepage identifies Kshetrapati Industries Pvt. Ltd. and describes AI, data, cloud, DevOps, and product-engineering services.
- The observed page behavior included no login form, hidden form, password submission, external password form, wallet interaction, or external network activity.
- External reputation checks recorded 10 malicious detections and 0 suspicious detections; Tier-1 detections included Kaspersky and Sophos, and a separate external blacklist was positive.

Regulatory Verification Notes

The available site content identifies the business as Kshetrapati Industries Pvt. Ltd. and provides corporate contact, team, and service information, but the supplied material does not show a claimed license, licensing authority, or registration number. This is a legal and disclosure verification gap rather than, by itself, evidence of fraud. Independently connecting the website to the stated real-world operator remains unresolved. The domain and technical configuration provide some administrative and technical continuity signals, but those signals cannot offset the external blacklist finding.

EVIDENCE

- Domain registration: 2019-03-17T09:08:22Z; age_years 7.43; expiration: 2028-03-17T09:08:22Z.
- Hosting resolved to AS26496, AS-26496-GO-DADDY-COM-LLC - GoDaddy.com, LLC, US.
- TLS certificate validation level: DV; issuer: Go Daddy Secure Certificate Authority - G2; valid to 2026-09-09T06:00:35+00:00.
- The homepage and corporate navigation identify services, products, team, contact information, and an address, but no license authority or license number is shown in the supplied content.

What to Verify Next

Before any sensitive engagement, an independent corporate-registry check should confirm that Kshetrapati Industries Pvt. Ltd. exists under the stated name and that its directors, address, and contact details correspond to the website. Any licensing or sector-specific authorization relevant to the proposed service should be confirmed directly with the applicable authority. Contact details should be validated through an independently sourced channel, and any proposed contract, payment destination, software download, or request for credentials should be reviewed through established procurement and security processes.

EVIDENCE

- The About and team content provides the claimed organizational identity to compare against an independent corporate registry.
- The Services and Products content defines the proposed business scope for determining whether any sector-specific authorization is relevant.
- The Contact page supplies the details requiring independent confirmation before commercial engagement.

Summary Verdict

The overall posture is **critical trust risk**. The site’s professional corporate presentation and technically normal browsing behavior do not resolve the decisive external security contradiction or establish the real-world operator’s identity. Sensitive interaction is not appropriate on the available evidence.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, and the observed infrastructure exposed only an edge address rather than an identifiable origin candidate. This reduces direct origin exposure and is a mitigating technical control, but it does not establish legitimacy or neutralize the external reputation risk.

Closing Assessment

Activity should remain limited to passive viewing until the organization and intended engagement have been independently validated; credentials, account access, downloads, and financial transactions should not be initiated through the site.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kshetrapati.info.

- The request stayed on kshetrapati.info. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. d/b/a Registrar.eu. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2028-03-17. CLEAR
- The earliest public archive of this site is from 2020-10-30. CLEAR
- It is hosted on AS-26496-GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kshetrapati.info at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
