

Is kupunasvolpiano.com safe? TrustSniffer's low-trust assessment: 25/100

kupunasvolpiano.com

Verdict

25
OUT OF 100

LOW TRUST

kupunasvolpiano.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-23 by automated analysis. Classification confidence 55%.

What this site appears to be

A default WordPress site page showing the standard 'Hello world!' post and theme attribution. No sign-in, payments, or advanced functionality on this page.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

What kupunasvolpiano.com served when TrustSniffer captured it on 2026-09-23. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a content-focused WordPress blog presenting the default “Hello world!” sample post, standard WordPress navigation, and a “Pet Clinic WordPress Theme” attribution; its apparent purpose is informational publishing rather than a clearly defined commercial, financial, or transactional service.

Scam/Impersonation Risk

The site presents a **high-risk interaction profile** because external security intelligence records a confirmed blacklist status and multiple malicious or suspicious detections. This is materially inconsistent with treating the domain as suitable for sensitive use, even though the reviewed homepage itself is a benign-looking default WordPress installation with no observed login, payment, or advanced functionality. No conflicting legal names or direct brand-impersonation indicators were observed, but the confirmed blacklist signal remains decisive for scam and impersonation risk. The domain’s recent registration and minimal site development further provide limited assurance of an established operating history.

EVIDENCE

- External reputation evaluation recorded 4 malicious detections, 2 suspicious detections, and a confirmed blacklist status across 2 blacklist sources.
- The registration record shows creation on 2025-09-16, an age of 1.02 years, and registration through Hosting Concepts B.V. d/b/a Registrar.eu.
- The homepage contains only the standard “Hello world!” WordPress sample content and theme attribution, rather than an established business presentation.

Regulatory Verification Notes

The reviewed site does not present a clear regulated business model, licensing claim, registration number, or identifiable operating-entity disclosure. Identity verification therefore remains unresolved, and any claim that the website represents a legitimate organization should not be treated as independently established. The absence of a licensing disclosure is a transparency gap requiring confirmation where regulated activity is contemplated; it is separate from the external blacklist finding. The site does have valid transport encryption, but certificate validity establishes encrypted communication, not operator legitimacy.

EVIDENCE

- The reviewed homepage contains no stated license number, regulatory authority, or clear corporate-entity disclosure.
- The site's TLS certificate is issued by YE2, uses DV validation, and is valid to 2026-12-10.
- Page analysis classifies the site as a WordPress blog with no identified financial, commerce, or regulated-service functionality.

What to Verify Next

Before any engagement beyond passive viewing, independently establish the operator's legal identity and confirm any claimed authorization directly with the relevant jurisdictional registry. Confirm official contact channels through an independent source, and do not submit credentials, financial information, or payment instructions unless those checks produce a satisfactory result.

EVIDENCE

- Browser testing recorded 0 login forms, 0 hidden forms, and 0 external password forms on the reviewed page.
- Browser testing recorded 0 wallet-provider detections, 0 wallet-connect runs, and 0 wallet-drainer runs.
- The reviewed page provided no transaction workflow or identifiable service process against which an operator claim could be validated.

Summary Verdict

The overall posture is **low trust**, with a clear risk of sensitive-interaction exposure. The available evidence does not independently verify the real-world operator, and the site should not be treated as an established or reliable counterparty for account, credential, financial, or other high-impact activity.

Infrastructure Integrity

The site resolves directly to Hostinger infrastructure rather than a detected CDN or WAF edge, with four likely origin addresses observed. This provides ordinary hosting functionality but offers no meaningful mitigating protection against the external reputation concerns; infrastructure characteristics alone do not establish legitimacy.

EVIDENCE

- Hosting is on AS47583, AS-HOSTINGER — Hostinger International Limited, CY; the observed server IP is 92.113.16.192.
- Infrastructure resolution identified 4 unique IP addresses, 0 edge IPs, and 4 likely origin IPs; no CDN was detected.

Closing Assessment

Restrict activity to passive observation unless independent identity, authorization, and contact-channel checks are completed; sensitive interaction should not proceed on the present evidence.

Written analysis generated 2026-09-23 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kupunasvolpiano.com.

- The request stayed on kupunasvolpiano.com. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. d/b/a Registrar.eu. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2028-09-16. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kupunasvolpiano.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
