Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the institutional online presence of Kwara State Polytechnic in Ilorin, Nigeria, presenting its academic institutes and programmes, admissions information, leadership, research activities, student services, news, and contact facilities for prospective students, current students, staff, and other stakeholders.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behaviour, malicious reputation findings, or other scam indicators were observed. The site's extensive institutional content aligns consistently with its stated public higher-education purpose, while its long and continuous history materially strengthens provenance. Interactive testing also found no credential-harvesting form, concealed form, cloaking, wallet-related activity, clipboard interference, or suspicious script behaviour.

- The About page identifies Kwara State Polytechnic and provides detailed coverage of its history, leadership, institutional units, student resources, and academic offerings across science, engineering, management, environmental studies, and information technology.
- The domain was registered in 2014 and is approximately 12.21 years old; registration is maintained through Upperlink Limited and currently expires on 21 May 2027.
- The web archive contains 2,156 snapshots from 3 July 2014 through 6 June 2026, covering 13 tracked years with no detected repurposing or substantive identity drift.
- The assessed page contained one contact form, with no sensitive fields or untrusted submission destination; no login form, hidden form, or deceptive browser behaviour was detected.

Regulatory Verification Notes

The website presents an identifiable public academic institution and uses Nigeria's education-specific `edu.ng` namespace. Its institutional identity is supported by substantive leadership, history, academic, and administrative content. No licensing or accreditation claim, named oversight authority, or registration number was identified in the supplied page evidence; for a higher-education institution, this is a disclosure-verification matter rather than an indication of fraud. External reputation checks were clean, and the site has an established global traffic presence.

- The About page characterizes the organisation as a public higher-education institution and identifies its academic and administrative structure.
- The site's observed domain is within the Nigerian `edu.ng` academic namespace.

- Major threat-intelligence checks recorded zero malicious and zero suspicious detections, no safe-browsing warning, no external blacklist finding, and no reported abuse associated with the assessed infrastructure.
- The site is served from AS398101 (GoDaddy.com, LLC); its DV TLS certificate was issued by Go Daddy Secure Certificate Authority - G2 and is valid until 2 October 2026.

What to Verify Next

Institutional due diligence should confirm the polytechnic’s current accreditation and programme approvals through the relevant Nigerian education authorities, particularly before enrolment or fee payment. Payment instructions, portal destinations, and official communications should be matched against independently obtained institutional records. Prospective users should also confirm the applicable admissions, refund, privacy, and data-handling terms for the particular service being used.

- The site navigation advertises separate Portal, e-Transcript, E-mail, and open-and-distance-learning services, creating several distinct transactional or account pathways that warrant destination matching.
- The academic pages present numerous specialised programmes, making programme-level accreditation confirmation more informative than institution-level confirmation alone.
- The captured page lacks a meta description, canonical declaration, and structured-data markup; these are minor publishing-quality limitations rather than security defects.

Summary Verdict

This is a legitimate, established, and trustworthy institutional website with coherent identity evidence, substantial academic content, durable provenance, clean external reputation, and benign observed behaviour. No contradictory risk signal undermines its claimed role as the online presence of Kwara State Polytechnic. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to a likely origin address hosted in the United States, without an observed CDN or WAF edge layer. Transport encryption is valid, and the identified mainstream hosting environment provides a sound baseline, although infrastructure protection alone is not proof of institutional legitimacy.

Closing Assessment

Standard use may proceed normally, with routine institutional due diligence appropriate before enrolment, payment, or other consequential transactions.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kwarastatepolytechnic.edu.ng.

- The request stayed on kwarastatepolytechnic.edu.ng. It was not redirected to another domain. CLEAR
- Registration is published under Upperlink Limited. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-21. NOTED
- The earliest public archive of this site is from 2014-07-03. CLEAR
- It is hosted on GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kwarastatepolytechnic.edu.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
