- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

labsystech.ru is a corporate website for “Лаборатория системных технологий,” a game development studio presenting its mobile and social games, development capabilities, company information, and employment opportunities. Its apparent business model is software and game production, supported by project showcases, technical-stack information, and a careers section with roles across quality assurance, design, programming, art, video, and analytics.

Scam/Impersonation Risk

No contradictions were observed: the available evidence identifies no phishing, impersonation, malicious-content, or conflicting-identity indicators. The homepage presents a coherent studio profile, including the stated development of mobile and social games since 2017, 16 released games, distribution across more than 20 platforms, and a team of more than 50 people. The site also provides substantive project and vacancy content rather than a credential-harvesting interface; testing found no login form, sensitive form, hidden form, wallet connection, or suspicious browser behavior. This combination, together with an established domain and sustained historical continuity, is consistent with a legitimate corporate site, although the real-world operator remains independently unverified.

EVIDENCE

- The homepage describes the studio’s game-development activity, projects, team, and employment opportunities.
- The domain was registered in 2017 and is approximately 9.57 years old; registration runs from 2017-01-17T07:43:34Z to 2027-01-17T07:43:34Z.
- The archive record contains 119 snapshots spanning 2017-04-24T05:48:09Z through 2026-06-08T01:35:46Z, covering 10 years with a maximum recorded gap of 1 year.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; the site is ranked 29318 globally and is within the top 1 million sites.

Regulatory Verification Notes

The site presents itself as a game studio and careers platform rather than a financial, investment, or other regulated service. Its company and careers content includes project information, technical details, vacancies, and contact or legal information, but the available evidence does not independently verify the operating entity or establish a regulated registration. This is a verification and disclosure consideration, not evidence of deception.

The broader signals remain consistent with an established site: the domain is registered through REGRU-RU, transport encryption is active, page content is substantive, and no third-party broker match or contradictory reputational signal was identified.

EVIDENCE

- The site is categorized as “Corporate / Careers” and contains no sensitive submission form or login form.
- The domain registrar is REGRU-RU; the recorded expiration date is 2027-01-17T07:43:34Z.
- Hosting is provided by SELECTEL-MSK - JSC Selectel, RU, on AS50340.
- The site uses a DV TLS certificate issued by YE2, valid through 2026-10-08T11:08:57+00:00.

What to Verify Next

Before any credential or payment interaction associated with an employment, commercial, or other transaction, independently confirm the legal identity of the contracting party and ensure that applicable terms, privacy provisions, refund or return arrangements, and payment protections are clear. Employment communications should be cross-checked through independently established company channels and the referenced professional or social platforms, rather than relying solely on information supplied by the website.

EVIDENCE

- The homepage provides the principal company and careers presentation against which an independently obtained legal-entity record can be compared.
- The careers section lists roles, experience requirements, and remote-work arrangements suitable for independent confirmation.
- The site references external professional and social channels, including hh.ru and VK, which can be checked separately.
- The site contains no payment workflow or sensitive form in the analyzed page behavior, so any later request for credentials or funds should be assessed as a separate interaction.

Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate corporate website. The conclusion is strong across content, historical continuity, technical security, reputation, and observed behavior, while the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site resolves directly to a single origin address, with no CDN or WAF detected. This means the hosting environment provides less edge-layer shielding than a site using mainstream CDN protection, but the resolved infrastructure is stable and attributable to a named hosting provider rather than presenting an unresolved or anomalous network posture.

Closing Assessment

Normal browsing and employment research are proportionate; independent confirmation of the contracting entity and transaction protections should precede any credential submission or payment.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of labsystech.ru.

- The request stayed on labsystech.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2027-01-17. NOTED
- The earliest public archive of this site is from 2017-04-24. CLEAR
- It is hosted on SELECTEL-MSK, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about labsystech.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
