Full analysis

Overview

This Spanish-language website is an online jewelry retailer presenting wedding rings and related pieces in 18K gold, 925 silver, gold-and-silver combinations, and platinum, with catalog pricing, showroom information, and an apparent sales model combining online retail with in-person visits in Buenos Aires.

Scam/Impersonation Risk

No contradictions were observed: the supplied findings identify no phishing, impersonation, blacklist, or malicious-content indicators. The site presents a conventional jewelry-retail proposition with product catalog content, showroom information, terms and privacy links, and no high-risk financial or cryptocurrency claims in the captured material. The available evidence is therefore consistent with an established, apparently legitimate website, although that conclusion does not independently prove the real-world operator's identity.

EVIDENCE

- The domain registration record shows creation on 2018-12-27 and an age of 7.65 years.
- Archive records show 25 snapshots spanning 2019–2026, covering 8 years.
- External reputation findings recorded no malicious or suspicious detections, no Google Safe Browsing hit, and no abuse reports for the observed Cloudflare delivery infrastructure.

Regulatory Verification Notes

The site includes legal-information links and identifies its commercial presence through showroom and contact content, but the supplied material does not independently verify the operating legal entity or establish a regulatory registration. The appearance of Mirna Badr in the site's design attribution and registration information is an identity signal, not proof of the operator's legal status or authority to transact. For an ordinary jewelry retailer, this is best treated as a merchant-identity and consumer-disclosure verification matter rather than evidence of a scam. A known registrar and valid transport encryption provide additional technical consistency with a functioning commercial website.

EVIDENCE

- The domain is registered through dattatec.com SRL, with an expiration date of 2030-12-27.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-09-30.
- The homepage links to "Política de Privacidad" and "Términos y Condiciones"; the supplied page content does not provide an independently verified legal-entity or licensing record.

What to Verify Next

Before credential or payment interaction, an interested party should independently confirm that the merchant operating the showroom corresponds to the business information presented on the site, review the applicable terms, privacy, delivery, returns, and warranty provisions, and use payment methods that provide appropriate consumer protection. Any applicable local business or consumer-trade registration should be checked through the relevant official registry rather than inferred from the website alone.

EVIDENCE

- The homepage provides a showroom and contact path that can be compared with independently obtained merchant information.
- The site exposes dedicated privacy and terms pages for review before a transaction.
- The catalog and account/cart functions indicate that transaction-specific payment, fulfillment, and return conditions warrant separate review.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate commercial website and no observed scam or impersonation contradiction. Confidence is moderated because the real-world operator identity has not been independently verified.

Infrastructure Integrity

The site is delivered through Cloudflare’s CDN/WAF infrastructure on AS13335, with observed addresses attributable to Cloudflare edge servers and no origin candidate identified in this analysis. This protective architecture reduces direct exposure of the hosting environment and is a mitigating technical signal, but it is not proof of merchant legitimacy.

Closing Assessment

Normal browsing is proportionate to the available evidence; credentials or payments should follow ordinary independent merchant-identity, return-policy, and payment-protection checks.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lacasadelasalianzas.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
