Full analysis

Overview

This is a local custom-furniture business website for La Casa Planejados in Caçapava, São Paulo, presenting bespoke design, production, installation, portfolio, and quote-oriented contact services for kitchens, bedrooms, closets, offices, and other interiors.

Scam/Impersonation Risk

The reviewed pages present a coherent local-business model and do not show a login form, cryptocurrency functionality, hidden sensitive forms, or detected brand-impersonation content. However, external reputation checks identified multiple malicious detections and a confirmed blacklist status, creating a material contradiction that outweighs the site's otherwise benign presentation. No conflicting legal identities were observed, and no direct impersonation or phishing feature was identified in the page content; nevertheless, the blacklist finding warrants a clearly cautionary posture for credentials, payments, or other sensitive interactions.

EVIDENCE

- Homepage: describes custom furniture design, production, and installation for residential and office environments, with no observed scam-oriented product mechanics.
- Contact and homepage pages: expose a standard contact form and business contact options rather than a login or credential-collection workflow.
- External reputation checks: recorded 5 malicious detections and confirmed blacklist status.
- Registration and archive records: registered 2017-08-18 (~9.01 years old); 26 archive snapshots spanning 2009–2026 (18 years tracked).

Regulatory Verification Notes

The About, Services, Portfolio, and Contact pages identify the business as La Casa Planejados and describe operations in Caçapava-SP, but the reviewed content does not independently establish the real-world operator's identity. No license or registration number is claimed on the site; for a custom-furniture retailer this is a transparency and verification matter rather than standalone evidence of fraud. The site's valid transport encryption and identifiable hosting provide technical continuity signals, but neither proves ownership nor offsets the external reputation contradiction.

EVIDENCE

- About page: identifies a local furniture business in Caçapava-SP and describes its project, manufacturing, supplier, and installation activities.
- Technical hosting record: served from AS53038, operated by IDC19 SOLUCOES EM TECNOLOGIA DA INFORMACAO LTDA, BR; resolved country NL.
- Site transport encryption: TLS certificate issued by YR1, DV validation, valid to 2026-11-06.
- Services and Contact pages: no license number, regulatory authorization, or registration disclosure is presented.

What to Verify Next

Before any payment, confirm the business's legal name, address, invoicing details, and applicable Brazilian commercial registration through an independent registry or offline business contact. Validate the telephone, WhatsApp, and physical address independently rather than relying solely on links supplied by the website. Obtain a written quotation covering materials, delivery, installation, cancellation, warranty, and refund terms, and use a payment method offering dispute and buyer protection.

EVIDENCE

- Contact page: provides a telephone number, WhatsApp channel, email route, and street address for independent confirmation.
- About page: supplies the stated business location and operating description that should be matched against external records.
- Services and Portfolio pages: provide the basis for requesting a written project specification and delivery commitments.
- Contact form: is presented as a quotation or inquiry channel rather than a sensitive account workflow.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. Although the website's content is consistent with a genuine local retail service, the confirmed external reputation contradiction makes legitimacy evidence-consistent rather than established and leaves the operator identity unverified.

Infrastructure Integrity

The site resolves to a single directly hosted endpoint with no detected CDN or WAF layer, and the infrastructure identifies AS53038 / IDC19 SOLUCOES EM TECNOLOGIA DA INFORMACAO LTDA. The valid DV certificate supports encrypted transport, but the absence of an edge protection layer means infrastructure controls provide limited mitigation for the external reputation concerns.

Closing Assessment

Sensitive actions should remain deferred until the business identity, contact channels, transaction terms, and payment protections have been independently confirmed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lacasaplanejados.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
