Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a French-language weather-information service presenting Swiss forecasts, radar coverage, national bulletins, and expert commentary, with free access supported by advertising and an optional VIP subscription for an ad-free premium experience.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive financial mechanics, or other fraud signals were observed. The site's coherent weather-focused content, named meteorological team, clean external reputation, and benign interaction behavior collectively support its legitimacy as an established informational service.

- The Swiss forecast page identifies meteorological and editorial personnel by name and role, including its information director, forecasting lead, meteorologists, editors, and production engineers.
- The assessed page contained no sensitive form, hidden form, untrusted form destination, suspicious inline script, wallet interaction, clipboard hijacking, or cloaking behavior.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing alert, no external threat-list hit, and 0 abuse reports.
- The domain held traffic rank 590,166, placing it within the measured global top one million.

Regulatory Verification Notes

The service is informational rather than a broker, payment provider, investment platform, or other regulated financial business. Its displayed business model is transparent at the point reviewed: free weather content with an optional subscription starting at €1.50 per month. Contact, legal, and privacy links are presented, and the absence of a financial-services licence claim is consistent with the site's function rather than an adverse regulatory signal.

- The forecast page describes the paid offering as navigation without advertising and displays its starting monthly price.
- The site navigation provides access to contact, legal, privacy, account, and sign-in functions.
- No broker profile or corresponding third-party broker-reputation record was identified for the service.
- The hosting infrastructure is served from AS20756 (NAMESHIELD - NAMESHIELD SAS, FR); its DV TLS certificate was issued by Encryption Everywhere DV TLS CA - G2 and is valid to 2026-09-21.

What to Verify Next

For institutional procurement or paid subscription approval, the current subscription terms, renewal and cancellation conditions, billing entity, and applicable privacy terms should be reviewed through the site’s published legal materials. Official contact channels may also be confirmed independently where customer-support escalation or recurring payment approval is required.

- The page offers account creation to retain saved locations and favourites, making the applicable account and privacy terms relevant to prospective registered users.
- A recurring monthly premium option is advertised, making renewal, cancellation, and billing provisions relevant before purchase.
- The navigation includes a dedicated contact route suitable for confirming customer-service and billing arrangements.

Summary Verdict

The website is a legitimate, established, and trustworthy weather-information service. Its consistent identity, substantive editorial content, clean security reputation, and benign observed behavior support normal interaction, including account login and standard use.

Infrastructure Integrity

The site resolves through two likely origin addresses in France without a detected CDN or WAF layer. Direct origin visibility is a conventional deployment choice rather than evidence of abuse; the resolved hosting environment and valid transport encryption provide a sound baseline for ordinary use.

Closing Assessment

Prospective users may use the service normally, with routine review of contractual terms before beginning a paid subscription.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lachainemeteo.ch.

- The request stayed on lachainemeteo.ch. It was not redirected to another domain. [CLEAR](#)

- It is hosted on NAMESHIELD, from a server in FR. **NOTED**

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lachainemeteo.ch at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
