Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established French weather-information portal operated under the La Chaîne Météo and METEO CONSULT brands, providing forecasts, severe-weather alerts, editorial reporting, videos, and specialist services for marine, beach, travel, mountain, pollen, and allergy conditions; its commercial model combines advertising-supported access with an optional paid VIP experience.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious reputation findings, or deceptive transaction mechanics were observed. The registered organizational identity is consistent with the branding presented by the website, while its long domain tenure, extensive historical record, strong global traffic footprint, and clean security reputation provide substantial evidence that it is a legitimate, established service.

- The domain registration records identify METEO CONSULT as the organization and Nameshield SAS as the registrar; registered 1996 (~29.7 years old).
- The domain has 1,088 archive snapshots spanning 1998–2026 (29 years tracked), with no detected suspicious repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, and no matching threat signatures.
- The domain holds global traffic rank 7,914, while observed homepage behavior showed no cloaking, hidden forms, suspicious scripts, clipboard manipulation, or external credential submission.

Regulatory Verification Notes

The site presents a coherent commercial identity for a weather and news service, supported by named experts, contact resources, and legal and privacy links. Its optional VIP offering begins at €1.50 per month and is described as providing advertising-free browsing and premium features. No sector-specific license is claimed, but the documented activity is not presented as a regulated financial, brokerage, or investment service, so the absence of such a claim does not create a legitimacy concern. No conflicting legal-entity names or adverse broker-reputation match were identified.

- The homepage identifies the service through the La Chaîne Météo and METEO CONSULT branding and provides access to legal, privacy, and contact resources.
- The homepage advertises VIP access from €1.50 per month for an advertising-free experience and additional premium functionality.

What to Verify Next

Before purchasing the VIP service, the prospective subscriber should review the checkout disclosures covering renewal, cancellation, refunds, and payment processing. Account holders should also review the privacy terms governing stored locations, search history, favorites, and geolocation, and retain the subscription confirmation and applicable terms for billing records.

- The homepage offers account creation and login functionality for retaining favorite locations.
- The homepage includes location-based functionality, recent-search history controls, and a facility to request creation of an unavailable location.
- A dedicated contact route is presented for service or account-related enquiries.

Summary Verdict

The website is legitimate, mature, and trustworthy, with strong convergence among organizational identity, historical provenance, public usage, technical security, and clean reputation evidence. Normal interaction—including account login, use of personalized features, and standard subscription activity—is appropriate.

Infrastructure Integrity

The site resolves directly to French infrastructure operated by NAMESHIELD SAS rather than through a detected CDN or WAF. Direct origin visibility is not inherently adverse in this context; the valid TLS deployment protects data in transit, while the infrastructure evidence remains a supporting security control rather than independent proof of legitimacy.

- The site is served from AS20756 (NAMESHIELD - NAMESHIELD SAS, FR), with two likely origin addresses and no detected CDN edge.
- The site’s transport encryption uses a DV certificate issued by Encryption Everywhere DV TLS CA - G2, valid until 2026-10-19.

Closing Assessment

Prospective users may use the site and its account or subscription functions normally, applying routine payment hygiene and retaining transaction records for any paid enrollment.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lachainemeteo.com.

- The request stayed on lachainemeteo.com. It was not redirected to another domain. CLEAR
- Registration is published under Nameshield SAS. CLEAR
- DNS for this domain is served by observatoiredesmarques.fr, across 3 name servers. NOTED
- The registration is paid up to 2026-11-27. NOTED
- The earliest public archive of this site is from 1998-02-05. CLEAR
- It is hosted on NAMESHIELD, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lachainemeteo.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
