

Is ladonnaraehconsulting.com a scam? TrustSniffer's high-risk assessment: 0/100

ladonnaraehconsulting.com

Verdict

0

OUT OF 100

CRITICAL RISK

ladonnaraehconsulting.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Raeh Consulting, a marketing and branding consultancy offering strategy, brand development, media visibility services, and a blog with articles and contact details (phone, email, mailing address).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://ladonnaraehconsulting.com/>

What ladonnaraehconsulting.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as Raeh Consulting, a professional marketing and branding consultancy offering strategic marketing, brand development, media visibility, digital-presence support, blog content, and consultation-based client engagements.

Scam/Impersonation Risk

The site's visible content is a conventional consulting presentation with no observed login form, cryptocurrency functionality, payment mechanism, or explicit brand-impersonation indicators. However, this benign page profile is outweighed by confirmed external threat intelligence: the domain received 10 malicious detections, was flagged by Fortinet and Sophos, and appears on external blacklist sources. These are direct contradiction signals affecting any sensitive interaction, even though no conflicting legal-entity names or page-level impersonation indicators were observed. The overall identity connection also remains unverified, so the site's presentation should not be treated as proof of the real-world operator.

EVIDENCE

- The homepage describes Raeh Consulting as a marketing and branding business and contains no observed login or password form.
- External analysis recorded 10 malicious detections and identified Fortinet and Sophos among the flagged security vendors.
- The domain was recorded as blacklisted by two external blacklist sources.
- The domain was registered on 2019-11-17 and is approximately 6.76 years old.

Regulatory Verification Notes

The site appears to operate as a general consulting business rather than presenting itself as a regulated financial or investment service. The supplied content does not show a license claim, licensing authority, or registration number; this is a disclosure gap requiring independent confirmation before any paid engagement, not by itself evidence of fraud. The displayed business identity is therefore only apparent, and independently verified ownership or legal status has not been established. Transport security is present, but domain-validated encryption confirms connection security only and does not validate the business or its regulatory standing.

EVIDENCE

- The supplied homepage content identifies the business as Raeh Consulting and invites consultation requests.
- No licensing authority or license number is shown in the supplied site content.
- The TLS certificate is domain-validated, issued by GoDaddy TLS Intermediate CA DV - R1v1, and valid until 2027-01-30 16:25:40 UTC.

What to Verify Next

Before any engagement, an independent company-registry search should confirm the operating entity, jurisdiction, and authority of the person or organization accepting fees. Any claimed professional credentials or regulated activity should be checked directly against the relevant official register. Contact details and the proposed service agreement should be validated through an independently sourced channel, with payment made only through a method offering meaningful dispute or recovery protections. Until those checks are complete, interaction should remain limited to passive review rather than credential submission, financial activity, or transmission of sensitive information.

EVIDENCE

- The site exposes one contact form and no observed sensitive form, login form, or password submission flow.
- The site's transport encryption is configured at domain-validation level rather than organization-validation level.
- The business model presented is consultation-led, making independent confirmation of the contracting entity and payment recipient material to any proposed engagement.

Summary Verdict

The website has a **critical trust posture** for sensitive interaction. Its professional appearance and ordinary consulting content do not overcome the confirmed external malicious detections and blacklist status, while the underlying operator identity remains unverified. Login, credential submission, and financial interaction are not appropriate on the basis of the available evidence.

Infrastructure Integrity

The site resolves directly to one apparent origin on AS400754, operated by GO-DADDY-COM-LLC (GoDaddy.com, LLC) in the United States; no CDN or WAF deployment was detected. GoDaddy hosting and a known certificate issuer provide ordinary infrastructure context, but they are service-layer characteristics and do not establish legitimacy or offset the external threat findings.

Closing Assessment

Prospective users should restrict activity to read-only review and proceed only after independent entity, credential, contact-channel, and payment-protection checks have been completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ladonnaraehconsulting.com.

- The request stayed on ladonnaraehconsulting.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-17. NOTED
- The earliest public archive of this site is from 2020-09-20. CLEAR
- It is hosted on GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ladonnaraehconsulting.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
