## Key findings

---

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

## Full analysis

---

### Overview

Heishop is Grupo HEINEKEN Brasil's digital B2B sales and ordering platform, presenting registered customers and resellers with product browsing, ordering, delivery tracking, invoices, promotions, credit information, and mobile access for commercial replenishment.

### Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent B2B ordering proposition tied to Grupo HEINEKEN Brasil, with registration, customer support, product ordering, invoice access, delivery tracking, and account functions aligned to the stated business model. The site does not exhibit phishing, brand-impersonation, malicious-content, or suspicious form indicators in the supplied evidence.

- The homepage identifies the service as "Heishop" and presents the Grupo HEINEKEN product portfolio, registration flow, ordering, promotions, invoices, and delivery support.
- The site's page analysis recorded no red flags, no suspected brand impersonation, no login-form anomaly, and no untrusted form destination.
- The domain was registered in 2018 and is approximately 7.95 years old.
- Historical coverage records 38 archive snapshots spanning 2023–2025, with three years tracked.

### Regulatory Verification Notes

The homepage and linked legal materials provide an identifiable commercial context, support information, physical-address information, and privacy and terms references. No regulated financial-service license is relevant to the stated beverage-ordering model, and no third-party broker association was identified. The supplied evidence does not establish a specific regulatory registration number, so that point remains a limited disclosure item rather than an adverse legitimacy finding.

- The page content describes a B2B ecommerce model for Grupo HEINEKEN products, with payment and fulfillment connected to product orders.
- The page assessment identifies legal-entity, address, support, privacy, and terms content.
- The site is hosted on AS53831 (SQUARESPACE - Squarespace, Inc., US).
- TLS is issued by YR2 at DV validation level and is valid to 2026-10-20.

What to Verify Next

For procurement or account onboarding, the prospective customer should confirm the applicable commercial account terms, delivery jurisdiction, payment instructions, and authorized support route through the organization's normal business-contact process. Any required corporate or tax documentation should be checked against the relevant local business records before establishing a new high-value purchasing relationship.

- The registration flow states that customer information is submitted before account instructions are issued by the central support team.
- The homepage presents invoices, credit limits, orders, promotions, and delivery as account-linked functions.
- The supplied page evidence does not identify a specific registration or license number.

Summary Verdict

The site presents as a legitimate, established, and trustworthy B2B commerce service with a coherent business purpose and no observed contradiction or impersonation indicators. Normal interaction, including account login and standard ordering activity, is appropriate.

Infrastructure Integrity

The site is delivered through Squarespace-managed infrastructure and a content-delivery network, providing a managed hosting layer that reduces exposure of the underlying service environment. This is a mitigating infrastructure signal, not independent proof of the operator's legitimacy.

Closing Assessment

Standard account registration and commercial ordering may proceed under the organization's ordinary procurement and payment controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of landing.heishop.com.br.

- The request stayed on landing.heishop.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cscdns.net, across 2 name servers. NOTED

- The registration is paid up to 2027-08-23. NOTED
- The earliest public archive of this site is from 2023-08-21. CLEAR
- It is hosted on SQUARESPACE, from a server in US. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about landing.heishop.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
