

Is laodong.vn legit? TrustSniffer's high-trust assessment: 90/100

laodong.vn

Verdict

90

OUT OF 100

HIGH TRUST

laodong.vn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

WHAT THIS SITE APPEARS TO BE

Editorial front page of Lao Động (Vietnamese news outlet) with broad topical navigation, articles, video player, social login options, and newsroom contact information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

https://laodong.vn/

What laodong.vn served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

What this website is

Lao Động is a Vietnamese editorial news publication presenting current affairs, business, sports, culture, education, health, labour, video, and other topical coverage, with advertising, audience-registration features, social login options, and published newsroom contact information.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent Lao Động news brand, broad editorial navigation, original article and video formats, and ordinary account features rather than investment, cryptocurrency, payment, or other high-risk transactional mechanisms. The available page analysis found no phishing, brand-impersonation, or malicious-content indicators; the site is therefore apparently legitimate and consistent with an established media publication, although this does not independently prove the real-world operator's identity.

EVIDENCE

- The homepage identifies the publication as Lao Động and presents extensive editorial sections, articles, video content, and newsroom-oriented navigation.
- The homepage's login, registration, and password-reset functionality has no untrusted form destination or hidden form detected.
- External reputation checks recorded no malicious or suspicious verdicts, no phishing result, and no blacklist hit for the domain.

Regulatory Verification Notes

The homepage states that the publication is associated with the General Confederation of Labour of Vietnam and provides newsroom and contact information. That on-site presentation is consistent with a genuine media outlet, but it remains an on-site identity claim rather than independent verification of the operating legal entity. No applicable media or corporate registration number is identified in the supplied page material, so the site's formal regulatory and ownership documentation should be treated as a transparency item for confirmation rather than as evidence of misconduct. A low-confidence reputational signal consists of reports against a shared Viettel Group provider address; the attribution is to shared infrastructure, not specifically to Lao Động. The overall convergence remains favourable, including a strong public traffic footprint, clean external reputation, and valid mainstream certificate issuance.

EVIDENCE

- The homepage states “Cơ quan của Tổng Liên Đoàn Lao Động Việt Nam” and includes a contact section among its internal navigation.
- The site is hosted on AS7552, VIETEL-AS-AP — Viettel Group, VN.
- The transport certificate is DV, issued by Sectigo Public Server Authentication CA DV R36, valid to 2026-12-30T23:59:59+00:00.
- The shared provider IP has 10 abuse reports with confidence score 3; the recorded usage type is Fixed Line ISP and the attribution is shared infrastructure.

What to Verify Next

Before credential or payment interactions, an independent route should confirm that the publication's stated institutional affiliation and contact details correspond to the intended Lao Động organization. Any applicable media-registration or publisher-status information should be checked with the relevant Vietnamese authority or official institutional directory, and any sponsored, subscription, or other paid offering should be reviewed for clear terms, refund treatment, and payment-provider protections.

EVIDENCE

- The homepage provides the stated institutional affiliation, newsroom information, and published contact route for independent comparison.
- The site exposes audience-registration and social-login functions, making account-handling and privacy terms relevant to credential-use decisions.
- The supplied material describes an ad-supported publication and does not identify a paid financial-service business model.

Summary Verdict

The overall posture is high trust and low risk. Available evidence is consistent with an established, apparently legitimate news website, with no observed scam, phishing, impersonation, or identity-conflict indicators; the remaining qualification is that the real-world operator identity is likely but not independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Viettel Group in Vietnam, with no CDN or WAF detected and a likely origin address visible. This is an identifiable hosting arrangement, while the absence of an observed protective edge layer means infrastructure should be treated as contextual mitigation only and not as proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture, while independent identity, terms, and payment-protection checks should precede any credential submission or financial interaction.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 10 reports on hosting IP 125.212.138.88 (Viettel Group, Fixed Line ISP), 3% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of laodong.vn.

- The request stayed on laodong.vn. It was not redirected to another domain. CLEAR
- It is hosted on VIETEL-AS-AP, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about laodong.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
