

Is lastoriamilitare.com safe? TrustSniffer's moderate-trust assessment: 64/100

lastoriamilitare.com

Verdict

64

OUT OF 100

MODERATE TRUST

lastoriamilitare.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Ecommerce site (La Storia Militare) selling books and collectibles focused on military history, with many product listings and category navigation; contains content related to controversial historical ideologies but shows standard shopping features (cart, login, add to cart).

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What lastoriamilitare.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

La Storia Militare is an online specialty bookstore and collectibles shop focused on military history, uniforms, memorabilia, magazines, books, DVDs, and related historical material. The site presents extensive category navigation, product listings, cart and checkout functions, user login, ordering guidance, and payment, shipping, privacy, and informational pages, indicating a conventional retail sales model.

Scam/Impersonation Risk

No confirmed phishing, impersonation, blacklist, or conflicting-identity signal was observed. The homepage's military-history catalogue, structured retail navigation, cart, login, and checkout functions are consistent with the stated bookstore model; its references to controversial historical ideologies and wartime material are subject matter characteristics rather than fraud indicators. However, the assessment records one external malicious detection, which is a soft reputational signal without corroboration from the other available reputation checks and does not establish that the site is malicious. Behavioral testing also recorded hidden forms and password-related external form posting, making credential handling a material sensitivity even though no brand impersonation or wallet-drainer behavior was identified.

EVIDENCE

- The homepage presents product categories for military history, the First and Second World Wars, uniforms, collectibles, books, DVDs, weapons-related historical material, and military equipment.
- The login and checkout functions are visible on the homepage, while behavioral testing recorded 2 hidden forms and external password-form posts.
- The domain was registered on 2013-11-22 and is approximately 12.75 years old; archival records show 97 snapshots spanning 2013–2026, with 14 years tracked.
- External reputation checks recorded 1 malicious detection, 0 suspicious detections, 0 abuse reports, and no confirmed blacklist result.

Regulatory Verification Notes

The site provides dedicated pages for information, company background, catalogue use, ordering, payments, shipping and delivery, privacy, and related policies. The available material does not independently verify the real-world operator's identity, and the supplied page evidence does not establish a legal-entity registration or regulatory licence; for a specialist retail business, that is a transparency and merchant-verification matter rather than evidence of a scam. The site's transport security and long operating history support an established online presence, but a domain-validated certificate confirms control of the domain, not the legal identity of the operator.

EVIDENCE

- The informational, "Who We Are," ordering, payments and delivery, and privacy pages are present in the site navigation.
- The domain registration record identifies PDR Ltd. d/b/a PublicDomainRegistry.com as registrar and records an expiration date of 2027-11-22.
- The site is served from AS52030, SERVERPLAN-AS – Server Plan S.r.l., Italy.
- The TLS certificate is issued by YR1 at DV validation level and is valid to 2026-09-23.

What to Verify Next

Before a high-value purchase or use of the account function, the prospective customer should independently confirm the merchant's legal name, physical business details, applicable returns terms, and payment-protection arrangements using the site's informational and ordering pages as starting points. Any claimed business identity should be checked through an appropriate corporate registry or other independent business source, and official contact channels should be confirmed through an offline or independently sourced route. Credential reuse should be avoided, and payment methods with dispute or chargeback protection should be preferred until those checks are complete.

EVIDENCE

- The “Who We Are” and information pages are the appropriate locations for confirming the operator’s stated business identity.
- The ordering, payments, shipping, and delivery pages define the transaction process and should be checked for returns, refunds, delivery terms, and payment safeguards.
- The site exposes both account-login and checkout workflows, creating separate identity and transaction-verification points.

Summary Verdict

The website presents a **moderate-trust posture**: its retail purpose, substantial catalogue, long-running domain presence, and absence of confirmed contradiction signals support apparent legitimacy, while the available evidence does not independently verify the operator and records technical handling concerns around sensitive interaction. It is best regarded as an apparently established but not fully identity-verified merchant.

Infrastructure Integrity

The site resolves directly without a detected CDN or WAF layer, so no edge-layer mitigation was identified; this is an infrastructure characteristic rather than evidence of maliciousness. The hosting arrangement is a conventional Italian data-centre deployment, and infrastructure protection should not be treated as proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate, but independent merchant and payment-protection checks should precede high-value purchases or sensitive account activity.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox, page content.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE
- The page contained a form a visitor cannot see.
Behaviour in a sandbox rule:BEHAV_HIDDEN_FORMS
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lastoriamilitare.com.

- The request stayed on lastoriamilitare.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by netsons.net, across 4 name servers. NOTED
- The registration is paid up to 2027-11-22. CLEAR
- The earliest public archive of this site is from 2013-11-29. CLEAR
- It is hosted on SERVERPLAN-AS, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lastoriamilitare.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
