

Is latinatel.net a scam? TrustSniffer's high-risk assessment: 5/100

latinatel.net

Verdict

5

OUT OF 100

CRITICAL RISK

latinatel.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

Corporate website for Latinatel offering wholesale voice termination and global eSIM products aimed at carriers, MVNOs and enterprises. The site lists experience, coverage statistics, service features, contact emails, and documentation links.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

eSIM SOLUTIONS

What latinatel.net served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Latinatel is a corporate B2B telecommunications website presenting wholesale international voice termination and global eSIM connectivity for carriers, MVNOs, operators, and enterprise partners. Its stated business model centers on contracted voice routes, eSIM data bundles, white-label services, and integration or usage fees, supported by claims of broad carrier reach, international coverage, and long industry experience.

Scam/Impersonation Risk

The site presents a coherent corporate telecom proposition and does not display login forms, wallet-connect functionality, payment conversion mechanics, or other obvious malicious page behaviors. However, this benign presentation is outweighed by confirmed external reputation contradictions: multiple threat-intelligence detections identify the domain as malicious or suspicious, and the domain is recorded on external blacklists. No conflicting legal-entity names or direct brand-impersonation indicators were observed, but the real-world operator remains unverified. The domain's long registration continuity and substantial archived presence provide provenance context, yet they do not neutralize the current reputation findings.

EVIDENCE

- The domain was registered on 2006-05-17 and is approximately 20.27 years old; the registrar is Domain.com - Network Solutions, LLC.
- The web archive records 483 snapshots spanning 2007-11-29 through 2026-05-05, across 20 tracked years.
- External reputation checks recorded 4 malicious and 1 suspicious detections, together with a confirmed blacklist presence.
- The homepage presents Latinatel as a wholesale voice and global eSIM provider, with no observed login form, hidden sensitive form, wallet connection, or external form submission.

Regulatory Verification Notes

The available corporate material describes wholesale voice services, global eSIM connectivity, white-label capabilities, and API integration, but does not state a licensing authority or license number. This is a material verification gap for a prospective telecom counterparty rather than, by itself, proof of misconduct. The site's operator identity is not independently verified, and the available ownership information is opaque; accordingly, the business claims should not be treated as proof of a legally established contracting entity. The confirmed blacklist status remains the principal reason the site cannot presently support sensitive commercial engagement, notwithstanding the identified registrar and valid transport encryption.

EVIDENCE

- The homepage identifies the business as "Latinatel | Wholesale Voice & Global eSIM Solutions" and describes services for carriers, MVNOs, and enterprise partners.
- The available business disclosures contain no stated licensing authority or license number.
- Hosting is on AS47583, AS-HOSTINGER - Hostinger International Limited, CY.
- The site uses a DV TLS certificate issued by YE2, valid through 2026-10-27.

What to Verify Next

Before any contractual, account, payment, or network-integration activity, an independent corporate-identity check should establish the legal entity behind Latinatel and confirm that the proposed contracting party matches the entity named in formal documentation. Any claimed telecom authorization should be checked directly with the relevant national or sector regulator, using regulator-controlled records rather than links or documents supplied solely by the site. Contact and commercial instructions should also be validated through an independently obtained business channel, and any technical onboarding should remain segregated until those checks are complete.

EVIDENCE

- The site presents a corporate B2B profile but does not independently establish the operating legal entity.
- Licensing status is not evidenced by a named authority or registration number in the available site material.
- The site's reputation assessment contains a confirmed blacklist result that requires resolution before sensitive engagement.
- The available material includes documentation and contact pathways, but those channels should be independently authenticated before use.

Summary Verdict

Latinatel has a professional corporate presentation and meaningful historical continuity, but the overall posture is **critical risk for sensitive interaction** because current external threat detections and confirmed blacklist records directly contradict the otherwise benign page presentation. The operator's identity is also unverified, so the site cannot presently be relied upon for credentials, financial activity, or binding commercial engagement.

Infrastructure Integrity

The site resolves directly to a Hostinger-hosted origin in Ukraine, with no detected CDN edge layer or WAF-mediated distribution. This provides a defined hosting path but offers limited infrastructure-based mitigation against the confirmed reputation concerns.

EVIDENCE

- Resolution returned 1 unique IP, with 0 CDN edge IPs and 1 likely origin IP.
- The resolved address was 92.113.36.101 in Ukraine.
- Hosting infrastructure identifies AS47583 and Hostinger International Limited, CY.

Closing Assessment

The appropriate interim posture is passive review only; sensitive or binding activity should remain deferred until independent identity, authorization, and channel validation are completed and the reputation findings are satisfactorily resolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of latinatel.net.

- The request stayed on latinatel.net. It was not redirected to another domain. CLEAR
- Registration is published under Domain.com - Network Solutions, LLC. CLEAR
- DNS for this domain is served by redalternativa.net, across 2 name servers. NOTED
- The registration is paid up to 2027-05-17. NOTED
- The earliest public archive of this site is from 2007-11-29. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about latinatel.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
