Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a corporate website for Laurel Mountain Energy, LLC, an independent upstream oil and gas operator focused on acquiring and developing hydrocarbon properties in the Appalachian Basin. It presents company, team, operations, landowner, community, and contact information, with an apparent business model based on production and asset development rather than direct financial solicitation.

Scam/Impersonation Risk

No contradictions were observed, including no indicators of phishing, impersonation, malicious activity, or a blacklist hit. The homepage presents a coherent corporate profile and does not expose visitors to login forms, payment forms, wallet connections, or investment solicitation mechanics. The available evidence is therefore consistent with an established, apparently legitimate corporate website, although this conclusion does not independently prove the real-world operator's identity.

EVIDENCE

- The homepage is classified as a corporate/about/contact page and presents oil and gas operations, team, landowner, and community content without financial solicitation or sensitive forms.
- Confirmed site behavior recorded no hidden forms, external password submissions, wallet activity, clipboard manipulation, or cloaking.
- The domain was registered on 2014-11-17 and is approximately 11.76 years old.

Regulatory Verification Notes

The site identifies itself as Laurel Mountain Energy, LLC, states that it is headquartered in Pittsburgh, Pennsylvania, and presents a claimed partnership with Outfitter Energy Capital. Those are on-site representations rather than independently verified legal-entity evidence. No licensing claim or license number was identified; for an upstream energy operator, the relevance of any licensing, permitting, or registration requirement depends on the specific activity and jurisdiction. Available external checks did not identify malicious or blacklist indicators, and no adverse broker-related signal was present. The website's transport security and established registration arrangements provide supporting legitimacy context, but do not substitute for independent entity or regulatory confirmation.

EVIDENCE

- The homepage states that Laurel Mountain Energy, LLC is an independent upstream company headquartered in Pittsburgh and partnered with Outfitter Energy Capital.
- Domain registration is through GoDaddy.com, LLC, with an expiration date of 2029-11-17.
- The site is hosted on AS398101, operated by GO-DADDY-COM-LLC / GoDaddy.com, LLC, US.
- The site uses a DV TLS certificate issued by Go Daddy Secure Certificate Authority - G2, valid through 2026-10-10.

What to Verify Next

Before any credential submission, contractual engagement, or payment interaction, independently confirm that the legal entity presented on the website corresponds to the intended counterparty through the relevant corporate registry. Where the engagement concerns an energy asset, investment, landowner arrangement, or production interest, confirm applicable permits, registrations, and counterparties through the responsible jurisdictional authority. Contact details should be validated through an independent channel, and any payment should use documented contractual terms and appropriate payment protections.

EVIDENCE

- The homepage provides a physical Pittsburgh address and telephone contact suitable for independent entity verification.
- The site identifies specific operational areas—acquisition, development, landowners, and community relations—that can be matched against external corporate and jurisdictional records.
- The assessment records the operator identity as independently unverified, so on-site identity claims should remain subject to ordinary counterparty checks.

Summary Verdict

Available evidence supports an established, apparently legitimate, low-risk corporate website. The convergence of coherent business content, long-standing domain registration, clean available reputation signals, stable technical behavior, and valid transport security supports the high-trust classification. The operator’s real-world identity remains independently unverified, so the legitimacy conclusion is evidence-consistent rather than proof of identity.

Infrastructure Integrity

The site resolves directly to a single GoDaddy-hosted address, with no CDN detected and no separate edge-IP layer identified. This provides a straightforward hosting posture but fewer intermediary protection layers than a site deployed behind a CDN or WAF; the identified hosting provider and stable resolution remain mitigating infrastructure signals rather than proof of legitimacy.

Closing Assessment

Ordinary engagement may proceed proportionately, provided independent counterparty, contractual, and payment-protection checks are completed before sensitive credentials or funds are involved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of laurelmountainenergy.com.

- The request stayed on laurelmountainenergy.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2029-11-17. CLEAR
- The earliest public archive of this site is from 2016-02-19. CLEAR
- It is hosted on GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about laurelmountainenergy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
