Full analysis

Overview

Laurel Nursery/Garden Center Inc's website is a local retail storefront for a brick-and-mortar garden center in Latrobe, Pennsylvania, presenting plants, houseplants, gardening supplies, mulch and topsoil, outdoor-living items, gift-shop offerings, and delivery information for prospective customers.

Scam/Impersonation Risk

No contradictions were observed across the site and available reputation checks: there were no phishing, impersonation, blacklist, or malicious-detection findings, and the site's content is consistent with an ordinary local retail business rather than a deceptive financial or credential-harvesting operation. The homepage and contact material identify a specific business name, physical location, telephone number, departments, and retail services. Behavioral inspection recorded suspicious inline scripting and substantial external network activity, but also found no login form, hidden sensitive form, cloaking, wallet interaction, clipboard manipulation, or other abuse pattern; these implementation anomalies therefore do not constitute an identity contradiction in the present evidence.

EVIDENCE

- The homepage identifies “Laurel Nursery/Garden Center Inc,” lists 3648 Route 30, Latrobe, Pennsylvania 15650, and provides a telephone contact.
- The site's homepage and department pages present conventional nursery and garden-center categories, delivery information, and business details; no financial solicitation or cryptocurrency functionality was observed.
- Domain registration records show registration on 2016-08-10, an age of 10.04 years, and an expiry date of 2031-08-10.
- Historical coverage records extend from 2018-08-06 through 2025-03-08, representing 8 years tracked, with no suspicious repurposing or semantic drift identified.

Regulatory Verification Notes

The site appears to operate as a conventional local retail merchant, for which the reviewed pages do not present a regulatory license claim or registration number. That is a verification and disclosure gap rather than evidence of fraud. The business and contact pages provide practical merchant information, while placeholder text associated with Yext and accessibility integrations reflects site-publishing quality issues but does not materially alter the apparent business purpose. No matching third-party broker reputation record was identified; this is contextual support only and is not a licensing determination. The available evidence is consistent with an established, apparently legitimate website, although the real-world operator identity is not independently verified.

EVIDENCE

- The About and Contact navigation identifies the business as Laurel Nursery/Garden Center Inc and supplies a physical address and telephone number.
- The reviewed business pages do not display a license authority, license number, or formal regulatory registration disclosure.
- The domain was registered through GoDaddy.com, LLC and is scheduled to expire on 2031-08-10.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-09-15.

What to Verify Next

Before credential or payment interactions, an independent merchant-identity check should confirm that the listed business name, physical address, telephone number, and any intended payment recipient correspond to the same local business. For a purchase, the applicable delivery, refund, and return terms should be obtained and payment should use a method offering dispute or purchase protection. Any business-registration or local commercial-status check should be performed through the relevant Pennsylvania or local authority rather than inferred from the website.

EVIDENCE

- The homepage supplies independently checkable location and telephone details for merchant-identity confirmation.
- The site presents delivery and retail information, making delivery, refund, and return terms the relevant transaction checks.
- The reviewed pages contain no account-login form or sensitive submission form requiring immediate credential disclosure.

Summary Verdict

The website has a high-trust, low-risk posture and is apparently legitimate based on converging business-content, domain-continuity, transport-security, and clean-reputation signals. No scam or impersonation contradiction was identified, but the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

Technical sensors identified the site on AS14618, operated by Amazon.com, Inc., while infrastructure resolution separately identified Oracle Corporation's US service on AS31898; this reflects distinct observed hosting and resolution layers rather than a demonstrated contradiction. No CDN was detected in the infrastructure record, and the assessed hosting environment provides a mitigating technical control context but does not independently establish legitimacy.

Closing Assessment

Normal browsing and ordinary retail engagement are proportionate to the current assessment, subject to independent confirmation of the merchant identity, transaction terms, and payment protection before material financial or credential-related activity.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about laurelnurseryinc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
