Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a local holiday-accommodation site for Lavender Point Holiday Units in Narooma, New South Wales. It presents self-contained accommodation beside Wagonga Inlet and appears intended to generate short-term-stay enquiries and bookings through published property information and contact channels.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent local hospitality offering, describing two-bedroom self-contained units, the Wagonga Inlet location, and accommodation-related contact details rather than requesting credentials, cryptocurrency transfers, or other unusual actions. Captured behaviour also showed no login form, hidden sensitive form, wallet connection, suspicious script, cloaking, or external network posting. The domain has a long-established continuity record, and external threat checks found no malicious or suspicious detections associated with the assessed site. This supports an apparently legitimate, low-risk presentation, although it does not independently verify the real-world operator.

EVIDENCE

- Homepage: Describes Lavender Point Holiday Units, six two-bedroom units and one single-room unit, gardens, Wagonga Inlet views, and short-term accommodation.
- Browser behaviour: Two successful runs; 0 external XHR requests, 0 external non-whitelisted posts, 0 hidden forms, 0 password forms, and 0 wallet-drainer runs.
- Domain and archive history: Registration continuity dates to 2009 (~16.98 years old); 64 archive snapshots spanning 2009–2025 (17 years tracked).
- External reputation checks: 0 malicious and 0 suspicious detections; phishing protection check negative; 0 abuse reports recorded.

Regulatory Verification Notes

The site is presented as an accommodation business rather than as a financial or otherwise regulated service. The captured homepage supplies a trading name and local property information but does not provide a legal-entity name, licence, registration number, or other formal operator disclosure. This is a transparency item for ordinary merchant-identity verification, not evidence of a scam. The domain is registered through GoDaddy.com LLC trading as GoDaddy.com, while the available evidence does not independently connect the site to a verified legal operator.

EVIDENCE

- Homepage: Identifies “Lavender Point Holiday Units” and the Narooma, NSW accommodation location but contains no visible licence or registration number.
- Domain registration record: Registrar listed as GoDaddy.com LLC trading as GoDaddy.com; registrant value listed as LAVENDER POINT.
- Hosting and transport: Served from AS136557 (HOST-AS-AP – Host Universal Pty Ltd, AU); TLS certificate issued by YE2 (DV), valid to 2026-11-16T08:36:15+00:00.

What to Verify Next

Before any credential or payment interaction, an independent check should confirm the accommodation operator's legal identity, booking terms, cancellation or return conditions, and payment-protection arrangements. Contact details should be validated through an independent local or offline source, and any payment request should remain consistent with the confirmed booking terms rather than relying solely on the website's presentation.

EVIDENCE

- Homepage: Functions as an informational accommodation and booking-contact surface, with no captured online account or payment form.
- Business model assessment: Classified as short-term accommodation with a low-risk presentation and no identified page-level red flags.
- Identity assessment: The website's apparent legitimacy is evidence-consistent, but independent operator verification remains incomplete.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate local accommodation website and supports a high-trust, low-risk posture. No phishing, impersonation, blacklist, or other contradictory signal was identified, while the identity of the real-world operator remains unverified.

Infrastructure Integrity

The site resolves to one identified hosting address associated with Host Universal Pty Ltd in Australia. No CDN or WAF was detected, so the infrastructure provides less intermediary shielding than an edge-protected deployment; this is an infrastructure characteristic rather than an indication of malicious activity.

Closing Assessment

Normal browsing is proportionate to the available evidence; independent confirmation of the operator, booking conditions, and payment protections should precede credential submission or payment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lavenderpoint.com.au.

- The request stayed on lavenderpoint.com.au. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com LLC trading as GoDaddy.com. CLEAR
- DNS for this domain is served by com.au, across 2 name servers. NOTED
- The earliest public archive of this site is from 2009-08-26. CLEAR
- It is hosted on HOST-AS-AP, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lavenderpoint.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
