

Is lctlaw.co.za a scam? TrustSniffer's high-risk assessment: 0/100

lctlaw.co.za

Verdict

0

OUT OF 100

CRITICAL RISK

lctlaw.co.za shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple web server directory index (Index of /) with minimal visible text and no forms or monetization cues.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

What lctlaw.co.za served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at lctlaw.co.za currently presents only a raw “Index of /” directory listing, showing file names, modification dates, sizes, and descriptions rather than a developed legal, commercial, or service-oriented web presence. Its apparent purpose and operating model cannot be established from the captured homepage.

Scam/Impersonation Risk

The site carries a **critical sensitive-interaction risk** because external reputation checks recorded a confirmed blacklist and multiple malicious detections, including a Tier-1 security-provider detection. These findings are materially more significant than the page-level scan, which found no login form, hidden form, suspicious script, or external network activity; the absence of active attack mechanics on a minimal directory page does not resolve the adverse reputation evidence. No separate identity contradiction or confirmed brand impersonation was observed, but the available evidence does not support trusted use of credentials, accounts, or financial functions.

EVIDENCE

- The homepage is a directory listing containing only “Index of /”, “Name”, “Last modified”, “Size”, and “Description”, with 57 characters of visible text.
- External reputation checks recorded 5 malicious detections and 1 suspicious detection; the domain was also recorded as blacklisted by 2 external sources.
- Browser testing recorded 0 external requests, 0 wallet-connection runs, 0 hidden forms, and 0 suspicious inline scripts across 2 successful runs.
- The domain was registered on 2015-07-13 and is approximately 11.11 years old.

Regulatory Verification Notes

The captured site does not provide a substantive legal or identity presentation from which an operating entity, regulated status, or applicable licence can be established. No licence claim, licence number, or regulatory authority is visible on the directory homepage; this is a verification gap rather than, by itself, proof of misconduct. Independent identity verification remains incomplete, and the negative external reputation signal should be treated as a serious reputational warning rather than a regulatory determination.

EVIDENCE

- The homepage contains no visible company profile, legal notice, terms, privacy notice, licence number, or regulatory disclosure.
- Registration is recorded through Absolute Hosting, with creation date 2015-07-13T21:16:35Z and expiry date 2028-07-13T21:16:35Z.
- The site is hosted on AS21499, identified as GODADDY-SXB - Host Europe GmbH, DE.
- The transport certificate is DV-validated, issued by YR2, and valid until 2026-09-28T06:10:45+00:00.

What to Verify Next

Before any sensitive interaction, an independent offline or authoritative route should confirm the real-world operator associated with the domain and establish whether any legal or regulated service is intended. Any claimed licence should be checked directly against the relevant regulator’s public register, and official contact channels should be confirmed independently rather than relying solely on material served by the site.

EVIDENCE

- The captured homepage provides no operator identity or regulatory information suitable for independent verification.
- The available identity-verification status is unverified, with no independently connecting identity signals recorded.
- The site’s visible content does not identify a business model, service offering, or responsible legal entity.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The evidence is dominated by confirmed adverse external reputation findings and an absence of substantive site context, while the available technical and behavioral signals do not provide sufficient grounds to offset that risk.

Infrastructure Integrity

The site resolves directly to one likely origin IP, with no CDN or edge IP detected; the hosting environment is identified as Host Europe GmbH in Germany on AS21499. A valid DV certificate issued by YR2 provides transport encryption, but this is only a technical protection and does not establish site legitimacy.

Closing Assessment

Activity should remain limited to passive observation until the operator, purpose, and any applicable regulatory standing have been independently confirmed; login, credential submission, and financial transactions should not be undertaken in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lctlaw.co.za.

- The request stayed on lctlaw.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Absolute Hosting. CLEAR
- DNS for this domain is served by pmhgroup.tech, across 2 name servers. NOTED
- The registration is paid up to 2028-07-13. CLEAR
- The earliest public archive of this site is from 2021-12-05. CLEAR
- It is hosted on GODADDY-SXB, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lctlaw.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
