

Is ldblog.jp legit? TrustSniffer's high-trust assessment: 100/100

ldblog.jp

Verdict

100

OUT OF 100

HIGH TRUST

ldblog.jp appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

A Japanese 'getting started' guide for the livedoor blogging platform describing features (custom domains, mobile support, analytics, migration) and account/plan options. No forms requesting sensitive information are present in the captured content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Japanese “getting started” guide for the livedoor Blog hosted blogging platform. It presents custom-domain configuration, mobile publishing and notifications, migration from other blogging services, real-time analytics, and account or plan options, with an apparent business model based on advertising, optional paid or advertising-free plans, and related domain and hosting services.

Scam/Impersonation Risk

No contradictions were observed. The captured page contains no sensitive-data form, login form, wallet interaction, or apparent brand-impersonation indicator, and the content is coherent with a conventional blogging-platform guide. External reputation checks found no malicious or suspicious detections, while the site's long registration continuity and consistent historical purpose provide additional provenance support.

EVIDENCE

- The domain was registered on 2009-04-10 and is approximately 17.35 years old.
- Web archives contain 286 snapshots spanning 2009–2026, with 18 years tracked.
- The homepage guide is classified as an informational platform page with no forms requesting sensitive information and no phishing indicators.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing hit identified.

Regulatory Verification Notes

The site presents ordinary platform governance links, including terms, guidelines, privacy, help, and a sitemap. The captured guide does not present a licensing claim or registration number; for a hosted blogging service, this is a disclosure and operator-identification matter rather than evidence of scam activity. The available evidence is consistent with an established, apparently legitimate service, but it does not independently verify the real-world operator behind the website.

EVIDENCE

- The homepage footer links to the terms of use, guidelines, privacy information, help, and sitemap.
- The captured guide presents no licensing authority or license number.
- The business-model assessment describes an established hosted blogging service with advertising and optional paid or advertising-free plans.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the operator name against the official corporate or service registry relevant to the jurisdiction. The terms, privacy, billing, cancellation, and any applicable refund provisions should be reviewed directly, and payment should use a method that provides appropriate transaction protection; official contact channels should also be confirmed through an independent route.

EVIDENCE

- The homepage provides direct links to the terms and privacy pages for follow-up review.
- The guide references account and plan options, making plan conditions and billing terms relevant verification points.
- The page identifies migration, mobile, and analytics functionality that can be tested without submitting sensitive information.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website rather than a scam or impersonation operation. The service appears suitable for normal browsing and ordinary platform use, while the operator's real-world identity remains independently unverified.

Infrastructure Integrity

The site resolves to hosting provided by LINE - LY Corporation in Japan on AS38631, with one likely origin address identified and no CDN edge layer detected in the captured posture. The hosting environment and transport security are positive mitigating signals, but they do not independently prove operator legitimacy.

EVIDENCE

- Served from AS38631, LINE - LY Corporation, JP.
- TLS certificate issued by YR1 with DV validation, valid to 2026-10-18T04:12:53+00:00.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely-origin IP.

Closing Assessment

Ordinary use may proceed with proportionate care; independent confirmation of merchant or operator identity, applicable service terms, and payment protection should occur before credentials or payments are committed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ldblog.jp.

- The request stayed on ldblog.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-37.net, across 4 name servers. NOTED
- The registration is paid up to 2027-04-30. NOTED
- The earliest public archive of this site is from 2009-08-26. CLEAR
- It is hosted on LINE, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ldblog.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
