Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

LeaderTelecom is an established B2B telecommunications services website offering IP address allocation, LIR and AS registration, IPv4/IPv6 services, and SSL certificates to businesses and individuals across Russia, the CIS, and Europe.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, technical, and reputation signals. The homepage presents a coherent corporate service model, with no detected phishing, credential harvesting, brand impersonation, deceptive financial claims, or malicious reputation findings. Normal interaction, including account login where provided and standard service use, is appropriate.

- The homepage clearly describes IP address, LIR/AS registration, IPv4/IPv6, and SSL certificate services.
- The site's forms analysis found no login form, sensitive form, hidden form, or untrusted submission destination.
- The domain was registered in 2007 and is approximately 18.92 years old.
- Historical coverage includes 112 archive snapshots across 14 tracked years, from 2012 through 2025.

Regulatory Verification Notes

The company and information pages provide business details, contact information, customer references, payment methods, privacy material, and operational policies. The site does not present a specific regulatory license or registration number; for this telecommunications service model, that is a transparency item for confirmation rather than evidence of misconduct. The available external reputation context is clean, while the site's relatively low page-authority signal is informational only and does not alter the legitimacy assessment.

- The homepage identifies paid B2B telecommunications and SSL certificate services and documents multiple payment channels.
- The company, contact, policy, reviews, and news pages are represented in the site's content structure.
- Hosted on AS61400 (NETRACK-AS - Start2 LLC, RU).
- TLS certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025 (DV), valid to 2026-09-20.

What to Verify Next

For procurement or regulated use, confirm the applicable telecommunications and certificate-service requirements with the relevant national or regional registry, and independently validate the company's published

contact and payment details before executing a material contract.

- The homepage provides the stated service categories and payment information.
- The company and contact pages provide the identity and communication details available for independent confirmation.
- The site’s policies describe privacy and data-processing practices.

Summary Verdict

The website presents a legitimate, established, and trustworthy corporate service posture. Its coherent business model, sustained historical presence, clean reputation, and consistent technical evidence support normal engagement without a heightened scam or impersonation concern.

Infrastructure Integrity

The site resolves directly to a single identified hosting address operated by NETRACK-AS - Start2 LLC in Russia, without detected CDN or WAF intermediation. This infrastructure is observable and consistent with a conventional hosted corporate website; the protective value of the transport layer is mitigating rather than independently determinative.

Closing Assessment

Standard browsing, account use, and ordinary service transactions are appropriate, with formal licensing and contractual checks applied where organizational policy requires them.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of leadertelecom.ru.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about leadertelecom.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
