

Is leads.bet safe? TrustSniffer's moderate-trust assessment: 65/100

leads.bet

Verdict

65
OUT OF 100

MODERATE TRUST

leads.bet is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

A domain marketplace listing for the domain leads.bet offered for sale via Nameshift.com/DomainEdeal with escrow transfer and seller contact details. The page contains FAQ, currency/payment options, and other domains listed by the seller.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What leads.bet served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

leads.bet is a parked domain-for-sale listing presented through Nameshift.com and DomainEdeal, offering prospective buyers the ability to purchase the domain or submit an offer through a brokered transfer and escrow-style marketplace service.

Scam/Impersonation Risk

No confirmed phishing, impersonation, malicious-content, or other contradiction signal was observed. The page clearly identifies the asset as a domain for sale, names the marketplace and seller, and does not present a login form, hidden sensitive form, wallet connection, or other credential-harvesting mechanism. A brand-similarity signal referenced ea.com, but the listing content does not corroborate an impersonation claim: it describes leads.bet as a sale listing rather than representing an electronic-arts service. Dynamic activity included external requests and non-whitelisted submissions; in this context, that is a contact or transaction-channel consideration rather than evidence of an active scam. Evidence:

- The homepage states that “leads.bet is for sale,” identifies Nameshift.com and DomainEdeal, and offers “Buy this domain” and “Make an offer” functions.

- Historical records contain 219 snapshots spanning 2017-03-17 through 2026-02-26, with 10 years tracked and a maximum observed gap of 2 years.
- The page analysis found no login form, hidden form, password-external form, wallet activity, cloaking, or clipboard manipulation.
- Behavioral telemetry recorded 21 external XHR requests, 2 external POST requests, and 4 non-whitelisted external XHR requests; no malicious or abuse-report finding was recorded in the available external checks.

Regulatory Verification Notes

The apparent business model is a conventional domain brokerage marketplace: buyers pay the purchase price, sellers pay commission, and the service describes transfer completion, seller payment after transfer, and refund handling if transfer cannot be completed. The page does not present a licensing claim or registration number, and the available material does not independently verify the real-world identity of the operator or seller. This is a transparency and verification matter for a commercial marketplace, not evidence of deception. No third-party broker match or active threat finding was recorded. Evidence:

- The listing identifies the seller as DomainEdeal and describes Nameshift.com as providing domain purchase, transfer assistance, VAT invoicing, and escrow-style handling.
- Technical hosting is identified as AS20473, AS-VULTR - The Constant Company, LLC, US.
- The site uses a valid DV TLS certificate issued by YE2, valid to 2026-10-08T05:13:46+00:00.
- The domain was registered through Sav.com, LLC, with a WHOIS creation date of 2024-07-02T10:08:27Z and an age of 2.14 years.

What to Verify Next

Before a high-value purchase or sensitive account action, the prospective counterparty should independently confirm the marketplace operator, seller authority to transfer the domain, escrow and refund conditions, taxes, and the precise payment recipient. Any applicable commercial, escrow, or brokerage registration should be checked against the relevant official registry rather than inferred from the page. Contact channels and transaction instructions should also be confirmed through an independently sourced route before funds are sent. Evidence:

- The homepage provides seller information, currency choices, purchase and offer paths, and stated transfer and refund terms for direct review.
- The page states that seller payment follows completed transfer and that a full refund is available if transfer cannot be completed; these conditions should be matched against the binding transaction terms.
- The supplied page content contains no license claim or registration number, making independent regulatory-status confirmation appropriate.

Summary Verdict

The available evidence supports a **moderate-trust, apparently legitimate marketplace listing** with no observed scam or impersonation contradiction. Its commercial presentation and technical operation are consistent with a functioning domain-brokerage service, while the operator and counterparty identity remain insufficiently established for unqualified reliance on sensitive or high-value transactions.

Infrastructure Integrity

A CDN/WAF layer is present, with observed edge infrastructure and potential origin candidates. This provides some mitigation against direct exposure and common web attacks, but it is a protective hosting characteristic

only and does not establish the operator’s legitimacy.

EVIDENCE

- The infrastructure record identifies CDN/WAF protection with edge IP 52.20.84.62 (AS14618).
- Three unique IPs were observed, including one edge IP and two likely origin candidates.

Closing Assessment

Routine browsing and review of the listing are proportionate, while high-value payments or sensitive submissions should proceed only after the independent counterparty, transaction, and payment-protection checks above are satisfied.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Dynamic Interaction Caution

- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of leads.bet.

- The request stayed on leads.bet. It was not redirected to another domain. CLEAR
- Registration is published under Sav.com, LLC. CLEAR
- DNS for this domain is served by nameshift.com, across 3 name servers. NOTED

- The registration is paid up to 2027-07-02. NOTED
- The earliest public archive of this site is from 2017-03-17. CLEAR
- It is hosted on AS-VULTR, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about leads.bet at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
