

Is lecom.com.br legit? TrustSniffer's high-trust assessment: 90/100

lecom.com.br

Verdict

90

OUT OF 100

HIGH TRUST

lecom.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Corporate site for Lecom Tecnologia presenting a national hyperautomation SaaS platform, product capabilities (AI, RPA, integrations), case studies, events/webinars, and corporate contacts. Includes privacy/cookie notice and company registration details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a corporate B2B technology platform for Lecom Tecnologia, presenting hyperautomation software and related professional services for enterprise process management. Its visitor-facing content describes capabilities involving artificial intelligence, robotic process automation, integrations, intelligent processes, case studies, webinars, implementation support, and corporate contact channels.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate/product profile rather than a deceptive financial, cryptocurrency, or credential-harvesting proposition; it contains no login form, hidden form, wallet-connect activity, or detected brand-impersonation indicator. The domain also has sustained historical continuity, and external reputation checks recorded no malicious or suspicious detections. The available evidence is therefore consistent with an established, apparently legitimate website, while independently connecting the online presence to the real-world operator remains unverified.

EVIDENCE

- The registered domain was created on 2001-03-02 and is 25.46 years old; the registration record names Lecom Tecnologia S/A.
- The domain has 345 archive snapshots spanning 2001–2025, covering 25 tracked years with a maximum recorded gap of 2 years.
- The homepage is classified as a corporate/product site, with no phishing, impersonation, crypto, wallet-drainer, or malicious-content indicators identified.

Regulatory Verification Notes

The site presents company information, corporate contacts, privacy and cookie notices, and a commercial SaaS business model. It does not claim a financial-services license or provide a license number, which is consistent with the stated provision of enterprise software and professional services but should not be interpreted as independent regulatory validation. The operator identity is not independently verified; accordingly, the apparent legitimacy of the corporate presentation should be distinguished from proof of the legal entity behind the website. Minor technical-quality observations included external browser requests and the absence of standard search metadata, but these were not accompanied by sensitive forms, cloaking, malicious scripts, or other abuse indicators and do not alter the low-risk assessment.

EVIDENCE

- The homepage describes Lecom Tecnologia's hyperautomation, AI, RPA, process-management, integration, case-study, webinar, and corporate-contact offerings.
- The site's forms are limited to a newsletter signup and contact request; no sensitive form or untrusted form destination was detected.
- The site is served from AS46606, Unified Layer, US.
- The TLS certificate uses YR1 as issuer, has DV validation, and is valid through 2026-10-16.

What to Verify Next

Before credential or payment interactions, an enterprise counterparty should independently confirm the contracting entity and its authorized representatives through a corporate registry or an established offline business channel. Procurement should also review the applicable service agreement, data-processing terms, renewal and termination provisions, support commitments, and payment-protection arrangements. Contact channels should be confirmed through an independently sourced company record rather than relying solely on the website.

EVIDENCE

- The homepage provides corporate contact and contact-request functionality but no sensitive login form.
- The site presents privacy and cookie notices alongside corporate and product information.
- The stated commercial model is enterprise SaaS access, implementation, and support rather than a regulated investment or brokerage service.

Summary Verdict

The overall posture is high trust and low risk, with convergent evidence supporting an established, apparently legitimate corporate website and no observed scam or impersonation contradictions. The principal qualification is that the real-world operator identity is not independently verified, so the trust conclusion should be understood as evidence-consistent rather than proof of ownership.

Infrastructure Integrity

The site is not fronted by a detected CDN edge and resolution identified one likely origin address, while the hosting environment is attributable and technically resolved. This infrastructure posture is a mitigating operational signal, not proof of legitimacy, and the direct hosting arrangement warrants ordinary exposure management by the operator.

EVIDENCE

- Infrastructure resolution identified 2 unique IP addresses, 0 CDN edge IPs, and 1 likely origin IP.
- No CDN vendor was detected in the observed infrastructure.

Closing Assessment

Normal browsing and ordinary business evaluation are proportionate to the assessed posture; credential or payment engagement should proceed after the independent merchant-identity, contractual, and payment-

protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lecom.com.br.

- The request stayed on lecom.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 141.6, across 4 name servers. NOTED
- The registration is paid up to 2032-03-02. CLEAR
- The earliest public archive of this site is from 2001-12-03. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lecom.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
