

Is legit.co.za legit? TrustSniffer's high-trust assessment: 90/100

legit.co.za

Verdict

90

OUT OF 100

HIGH TRUST

legit.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

WHAT THIS SITE APPEARS TO BE

Official-looking ecommerce site for the LEGiT fashion brand offering clothing, shoes, accessories and beauty items with product listings, prices, customer reviews, social feeds and store information. No evidence of high-risk financial or credential harvesting behavior.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2005.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is LEGiT's established-looking fashion retail storefront, presenting clothing, shoes, accessories, beauty products, promotions, customer reviews, store information, delivery options, and returns policies for online and physical-store purchases.

Scam/Impersonation Risk

No contradictions were observed. The homepage and product catalogue present a coherent retail model rather than financial solicitation, credential harvesting, or cryptocurrency activity; testing found no login form, hidden form, wallet connection, password-external form, cloaking, clipboard activity, or other phishing mechanism. External reputation checks found no malicious or suspicious classification, no phishing or blacklist hit, and no suspected brand impersonation. An IP-level abuse signal is discounted because it was attributed to shared provider infrastructure, was whitelisted, and carried no confidence of site-specific abuse. The long-running historical record also shows continuity rather than suspicious repurposing. The operator's real-world identity remains likely rather than independently verified, so the site's apparent legitimacy should not be treated as proof of the legal operator's identity.

EVIDENCE

- The homepage and catalogue identify an ecommerce/retail business offering clothing, shoes, accessories, beauty products, promotions, and store information; no high-risk financial or credential-harvesting features were identified.
- The domain was registered in 2003 and is approximately 22.81 years old.
- The archive contains 236 snapshots spanning 2005–2026, with 22 years tracked.
- The observed IP-level signal recorded 181 reports against shared infrastructure, with a whitelisted status and confidence score of 0; it was not attributed specifically to the website.

Regulatory Verification Notes

The available pages support a conventional retail business model: the homepage provides product categories and prices, while the contact, delivery-and-returns, privacy, and store-information pages provide ordinary ecommerce functions. No financial-services, investment, or other regulated-product claim was identified, and no licensing number was presented as part of the retail offering. The site's legal and merchant disclosures should therefore be treated as ordinary ecommerce information rather than independent proof of corporate identity. The

registration record identifies xneelo (Pty) Ltd as registrar and TenacIT as the organization, while the available evidence does not independently establish that this organization is the operating LEGiT merchant.

EVIDENCE

- The site's contact, delivery-and-returns, and privacy pages are linked from the homepage and describe standard ecommerce support and transaction processes.
- The domain registration record lists xneelo (Pty) Ltd as registrar and TenacIT as organization.
- The site is served from AS13335, CLOUDFLARENET—Cloudflare, Inc., US.
- The transport certificate is issued by YE2, uses Domain Validation (DV), and is valid to 2026-11-08.

What to Verify Next

Before credential or payment interactions, independently confirm the merchant's legal name and trading address through an offline or separately sourced contact channel. Review the delivery-and-returns terms for refund timing, exclusions, delivery obligations, and dispute procedures, and use a payment method that provides appropriate transaction protection. Account credentials should be unique to this service, and any contact details used for support should be confirmed through the site's independently validated store or corporate channels.

EVIDENCE

- The contact page provides the site's stated support and merchant-contact information for independent comparison.
- The delivery-and-returns page is the relevant source for shipping, return, and refund conditions.
- The homepage provides store-finder and physical-store information that can be compared with independently sourced merchant details.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate low-risk ecommerce website. Its coherent retail content, sustained historical presence, clean threat findings, and stable technical operation support a high-trust posture, while independent confirmation of the real-world operator remains appropriate before sensitive commercial engagement.

Infrastructure Integrity

The site uses Cloudflare CDN/WAF protection, which is a mitigating control for edge exposure and service delivery but is not, by itself, proof of legitimacy. The observed infrastructure includes a Cloudflare edge address and a potential origin candidate; this configuration should be understood as a protective hosting arrangement rather than an identity signal.

EVIDENCE

- Cloudflare CDN/WAF protection was detected for the website.
- The observed Cloudflare edge IP was 23.227.38.65, associated with AS13335.

Closing Assessment

Ordinary browsing is proportionate to the available evidence; before submitting credentials or payment details, complete the independent merchant-identity, returns-policy, and payment-protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 181 reports on hosting IP 23.227.38.65 (Shopify, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of legit.co.za.

- The request stayed on legit.co.za. It was not redirected to another domain. CLEAR
- Registration is published under xneelo (Pty) Ltd. CLEAR
- DNS for this domain is served by host-h.net, across 4 name servers. NOTED
- The registration is paid up to 2026-10-27. NOTED
- The earliest public archive of this site is from 2005-01-31. CLEAR
- It is hosted on CLOUDFLARENET, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about legit.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
