

Is lekkeslaap.co.za legit? TrustSniffer's high-trust assessment: 90/100

lekkeslaap.co.za

Verdict

90

OUT OF 100

HIGH TRUST

lekkeslaap.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

LekkeSlaap is an accommodation booking platform for South Africa listing properties, regions, deals, reviews and a rewards program. The page provides search, listing highlights, promotions and calls to host with the platform.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

LekkeSlaap is a South African accommodation-booking marketplace that presents property listings, destination searches, deals, reviews, rewards, vouchers, and host-partnering options, with the apparent business model of connecting travellers with accommodation providers and facilitating bookings and related payments.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, brand-conflict, or confirmed malicious-reputation indicators. Interaction telemetry did record one suspicious inline script, non-whitelisted external activity, and substantial page changes after interaction; however, the same testing found no hidden forms, externally submitted password forms, wallet activity, clipboard hijacking, or cloaking. These are implementation and monitoring signals rather than evidence that the site is operating as a scam. The domain's established registration continuity and clean external reputation materially support the conclusion that the website is apparently legitimate, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage was captured with no listed red flags, no suspected brand impersonation, and no phishing indicators.
- External reputation telemetry recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and a whitelisted status for the observed content-delivery infrastructure.
- Behavioural testing completed 2 successful runs; it recorded 1 suspicious inline script, 14 external XHR requests, 25 external POST requests, and 0 hidden forms, 0 external password forms, and 0 wallet-drainer runs.
- The domain's traffic measurement ranked it 20,684 and placed it within the top 1,000,000 domains.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate accommodation marketplace, but the operator's real-world identity is not independently verified. The registration record lists Gandi as registrar and associates the domain with Tripco (Pty) Ltd; this is a useful administrative identity signal, not independent proof that the website is operated by that entity. The captured site presents About Us and Contact Us pathways, but does not state an applicable licensing authority or license number. For this type of marketplace, that is a transparency and verification point rather than evidence of fraud. The site also has no matched record in the supplied broker-reputation context.

EVIDENCE

- Domain registration record: created 2012-10-19 and recorded as 13.82 years old; registrar Gandi; listed organization Tripco (Pty) Ltd.
- Hosted on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-14T05:57:59+00:00.
- The captured homepage includes About Us and Contact Us navigation but no stated license number or licensing authority.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the merchant identity associated with the booking, review the applicable cancellation and refund terms, and establish which payment-protection mechanisms apply. Any applicable travel, marketplace, or consumer-protection registration should be checked with the relevant official registry, and contact channels should be confirmed through an independently sourced route rather than relying solely on the website.

EVIDENCE

- The homepage provides Login, Signup, About Us, Contact Us, and booking-related navigation points for independent review.
- The stated business model involves booking and payment options, making merchant identity, cancellation terms, and payment protections the most relevant pre-transaction checks.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. No scam or impersonation contradiction was identified, although the available evidence does not independently verify the real-world operator identity.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than identified origin candidates. This reduces direct exposure of the hosting environment and is a mitigating infrastructure signal, but it is not proof of business legitimacy.

Closing Assessment

Normal browsing and ordinary account or booking activity are proportionate to the assessed posture, subject to routine independent checks of merchant identity, applicable terms, and payment protections before sensitive or financially consequential interactions.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lekkeslaap.co.za.

- The request stayed on lekkeslaap.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Gandi. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-19. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lekkeslaap.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
