

Is letyshops.com legit? TrustSniffer's high-trust assessment: 90/100

letyshops.com

Verdict

90

OUT OF 100

HIGH TRUST

letyshops.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

LetyShops cashback landing page for Finland: describes how cashback works, shows store categories and cashback rates, invites users to register/login and install an extension, offers PayPal payouts and a referral bonus.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the Finland-facing LetyShops website, presenting a localized cashback and rewards marketplace that directs visitors toward online-shopping offers, account registration, and related service features.

Scam/Impersonation Risk

No contradictions were observed across the supplied page, reputation, historical, and technical evidence. The site's stated model—aggregating affiliate offers and returning part of the commission as cashback, with PayPal payouts, referral incentives, and a browser extension—is internally coherent and was not accompanied by phishing, brand-impersonation, malicious-content, or suspicious-contact indicators. The login and signup functions create an ordinary credential-interaction consideration, but the page analysis found no hidden forms, untrusted form destinations, wallet-drainer behavior, or password submissions to external forms. Some dynamic behavior, including DOM changes, external requests, and console errors, is more consistent with application complexity or implementation noise than with a confirmed abuse pattern. The available evidence supports an established, apparently legitimate site, while independently connecting it to a specific real-world operator remains unresolved.

EVIDENCE

- The domain was registered in 2014 and is approximately 12.17 years old.
- Historical records contain 1,129 snapshots spanning 2013–2026, across 14 years tracked.
- The domain is ranked 5139 globally and is within the top 1 million websites.
- Reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The reviewed Finland landing page clearly identifies the service category and commercial mechanism, but the supplied page evidence does not independently establish the legal entity operating the service. No license or registration number is claimed in the reviewed content; for a cashback marketplace this is a regulatory-transparency item to clarify rather than evidence of a scam. The operator's identity should therefore be treated as unverified even though the broader evidence is consistent with an established website. No adverse third-party broker-reputation match was identified.

EVIDENCE

- The site's transport encryption uses a DV certificate issued by Amazon RSA 2048 M01, valid through 2027-02-15.
- Hosting resolves to AS16509, Amazon.com, Inc., United States.
- The Finland landing page contains localized country selection, store categories, cashback information, and registration/login functions but no stated license or registration number.
- Page-authority evidence places the site in a high authority band.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the merchant or service operator named in the applicable terms and privacy materials, verify any consumer-services registration or licensing requirement with the relevant registry, and review payout, referral, cancellation, and dispute provisions. Payment activity should use protections appropriate to the transaction, and official support channels should be confirmed through an independently obtained route rather than relying solely on page-provided contact details.

EVIDENCE

- The reviewed page is localized for Finland and states that country selection affects available offers and stores.
- The site provides account registration and login paths, making independent confirmation of the intended service counterparty relevant before credential use.
- The service presents cashback and payout functionality, making review of applicable terms and payment-protection arrangements relevant before financial interaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradiction. The positive assessment concerns the website's observable trust posture; it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The website is protected by Amazon Web Services CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than an exposed origin address. This provides a meaningful mitigation against direct origin exposure and common volumetric or application-layer abuse, but remains an infrastructure control rather than proof of legitimacy.

EVIDENCE

- AWS CDN/WAF protection was detected, with 3 observed edge IP addresses and 0 likely origin candidates.
- The observed edge infrastructure is associated with Amazon.com, Inc., United States.

Closing Assessment

Normal browsing and standard service use are proportionate to the available evidence, subject to ordinary independent checks of the merchant identity, applicable terms, and payment protections before credentials or payments are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of letyshops.com.

- The request stayed on letyshops.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-10.org, across 4 name servers. NOTED
- The registration is paid up to 2031-06-12. CLEAR
- The earliest public archive of this site is from 2013-07-27. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about letyshops.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
