Full analysis

Overview

This is an informational website for Laxmi International Academy, presenting school admissions, curriculum, academic sections, activities, notices, faculty-related information, contact details, and an asserted CBSE affiliation for a local K–12 educational institution.

Scam/Impersonation Risk

The principal risk signal is external rather than a deceptive mechanism observed in the page content: the domain is recorded as blacklisted by two external sources, and two malicious detections were reported in the evaluated reputation results. This creates a material contradiction requiring a security-forward posture even though the homepage presents ordinary school information, contains no login form or sensitive submission form, and shows no direct brand-impersonation indicators. The site's apparent educational purpose therefore does not neutralize the external reputation findings, and identity verification remains unresolved.

EVIDENCE

- External reputation assessment records the domain as blacklisted, with sources identified as VT and EXTERNAL_BLACKLIST.
- The same assessment records 2 malicious detections out of the evaluated results.
- The homepage presents school information and a newsletter form only; page analysis identifies no login form, hidden form, or sensitive form.
- Domain registration telemetry records creation on 2018-05-13 and an age of 8.28 years.

Regulatory Verification Notes

The site identifies itself as Laxmi International Academy, gives a Rajasthan address and telephone contacts, and displays “Affiliated to C.B.S.E., New Delhi” with affiliation number 1730798. Those statements are on-site representations, not independent confirmation of the operating entity or affiliation. The supplied evidence does not independently verify the institution's legal operator or any applicable registration status, while the site's governance and ownership disclosures remain unclear. The absence of a broker-dataset match provides no regulatory conclusion either way.

EVIDENCE

- The homepage and school-profile navigation identify “LAXMI INTERNATIONAL ACADEMY” and provide the stated CBSE affiliation number 1730798.
- The homepage contact area lists Laxmi Nagar, Bidara, Shahpura, Jaipur, Rajasthan 303103, together with telephone contacts.
- Domain registration identifies Unstoppable Domains Inc. as registrar, with expiration recorded as 2027-05-13.
- The site's transport encryption uses a DV certificate issued by YE1, valid through 2026-11-18; hosting is recorded on AS47583, AS-HOSTINGER – Hostinger International Limited, CY.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the school's legal identity and CBSE affiliation through the relevant official education or institutional registry, using contact details obtained independently rather than relying solely on the website. Any request for credentials, payments, document uploads, or account creation should be validated through an offline or independently sourced institutional channel, and payment protections should be confirmed before tuition or other transfers.

EVIDENCE

- The homepage provides a stated affiliation number and institutional contact details suitable for comparison against an independent registry.
- The site exposes a standard newsletter form but no sensitive form, so any later request for credentials or financial information would represent a materially different interaction from the observed homepage behavior.
- External reputation results contain the confirmed blacklist finding that warrants independent channel validation before sensitive use.

Summary Verdict

The website presents a credible-looking educational information model and has several supporting technical and historical indicators, but the confirmed external blacklist and malicious detections produce a **low-trust, sensitive-interaction risk posture**. The real-world operator is not independently verified, so the site's institutional presentation should not be treated as proof of identity.

Infrastructure Integrity

The confirmed infrastructure is hosted through AS47583, operated by Hostinger International Limited, with a valid DV TLS certificate issued by YE1. These controls support encrypted transport and identifiable hosting, but they are technical safeguards only and do not offset the external reputation contradiction.

Closing Assessment

Use should remain limited to passive information review until the institution, affiliation, and any sensitive interaction route have been independently validated.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about liashahpura.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
