- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Portuguese-language local news portal serving Teixeira de Freitas and the Extremo Sul region of Bahia, publishing regional reporting across public safety, politics, health, education, sports, events, and technology through an advertising-supported model with free reader access.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or malicious reputation signals were observed. The publication's long-established domain, extensive and continuous archival record, current editorial focus, and clean external security reputation converge strongly in support of a legitimate media operation. Its observed forms were limited to search and consent preferences, with no sensitive, concealed, or externally directed credential collection.

- The domain registration record identifies Radio Liberdade as the owner and shows registration on 6 April 2010 (~16.34 years old), with expiration on 6 April 2032.
- The web archive contains 631 snapshots spanning 19 April 2010–25 July 2026 (17 years tracked), with no suspicious repurposing or semantic drift established.
- The homepage presents substantial regional editorial content under the Liberdade News identity, with no detected brand impersonation or fraud indicators.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and an established traffic rank of 193,961.

Regulatory Verification Notes

The observed activity is news publishing and advertising rather than a financial, payment, brokerage, or investment service; consequently, no sector-specific financial licence is indicated by the business model. The homepage identifies the publication through its regional editorial positioning and provides an advertising contact channel, although the supplied page evidence does not establish the contents of separate corporate or legal-disclosure pages. This is a minor documentation consideration, not an indication of illegitimacy.

- The homepage offers editorial material without an indicated payment, investment, or transactional requirement.
- The homepage's observed interaction surface consists of a search form and an advertising-consent preference form; neither requests sensitive information.

- The captured page contains no cryptocurrency, token, brokerage, investment-return, or regulated-financial-service claims.
- No corresponding broker profile was identified in the supplied third-party broker-intelligence context, which is consistent with the site’s non-broker business model and is not a licensing determination.

What to Verify Next

Enterprise onboarding may confirm the publication’s official business and editorial contact channels through an independent directory or offline route. Privacy reviewers should also examine the consent configuration before enabling personalized advertising, precise geolocation, cross-site profiling, or device linking in a managed environment.

- The homepage includes a large consent-management interface covering advertising and audience measurement.
- The consent interface discloses requests associated with personalized advertising, precise geolocation, cross-site profiling, and device linking.

Summary Verdict

The site is a legitimate, established, and trustworthy regional news publication. Its identity, operational history, substantive editorial presence, and clean security reputation converge without contradictory signals, supporting a high-confidence posture for ordinary use.

Infrastructure Integrity

The site uses Cloudflare’s mainstream CDN/WAF environment, with all observed addresses operating as edge infrastructure and no origin candidate exposed during the analysis. This reduces direct origin exposure and supports transport and availability protection, while remaining a mitigating technical control rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- The site’s transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 21 September 2026.

Closing Assessment

Normal interaction, including routine browsing, standard account use, and login where offered, is appropriate under ordinary organizational security controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of liberdadenews.com.br.

- The request stayed on liberdadenews.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about liberdadenews.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
