

Is limorigal.com a scam? TrustSniffer's high-risk assessment: 0/100

limorigal.com

Verdict

0

OUT OF 100

CRITICAL RISK

limorigal.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Rigal Limousine / Limorigal offering premium executive transport services in Lima and LATAM, including limo rentals, corporate transfers, airport shuttles, event transport, and vehicle fleet information. Contact and quote forms plus WhatsApp integration available.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://limorigal.com/>

What limorigal.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents Limorigal as a premium executive transportation and limousine-rental service serving Lima, Peru, and wider Latin America, with offerings for corporate travel, airport transfers, weddings, events, and vehicle hire; its apparent business model is paid bookings supported by quotation forms and WhatsApp contact.

Scam/Impersonation Risk

No conflicting legal identities, brand-impersonation indicators, or phishing forms were identified in the reviewed page content. However, the domain is subject to a confirmed blacklist finding and multiple malicious-security detections, including detections attributed to Fortinet and Sophos. That external evidence is a material contradiction to the otherwise conventional local-service presentation and warrants a clearly cautionary posture for sensitive interactions. The observed site behavior did not show credential-harvesting forms, wallet activity, cloaking, or suspicious script behavior, but those benign page-level characteristics do not offset the confirmed external reputation concern.

EVIDENCE

- The domain was registered on 2005-08-03 and has an age of 21.06 years, according to registration records.
- External reputation evaluation recorded 11 malicious detections from 16 effective evaluations, with Fortinet and Sophos identified among the flagged vendors.
- The domain was marked as present on two independent blacklist sources.
- The homepage returned a stable service page with one contact/quote form and no login or password form.

Regulatory Verification Notes

The site describes a commercial transportation service, but the available disclosure state is unclear and no licensing authority or license number is claimed. This is a verification gap rather than proof of fraud; nevertheless, the confirmed external reputation issue means the site's commercial presentation should not be treated as sufficient evidence of operator legitimacy. Registration privacy is an administrative limitation and is not, by itself, an identity contradiction. The available evidence connects the website to the stated service only on a likely, not independently verified, basis.

EVIDENCE

- The site's service and contact content does not state a licensing authority or license number.
- The domain is served through AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1, uses Domain Validation (DV), and is valid to 2026-10-22T16:49:18+00:00.
- The page-authority assessment places the site in the mid authority band, which is contextual only and does not establish legal standing.

What to Verify Next

Before any booking, payment, or transmission of personal information, an independent party should confirm that the operating business exists at the claimed service location and that any required transport or commercial authorizations can be matched to the contracting entity. Payment instructions should be validated through an independently obtained business contact route, and any social or messaging channel used for a booking should be checked against separately sourced business information. If a booking is necessary, payment protection, cancellation terms, vehicle details, and the named contracting party should be confirmed before funds are released.

EVIDENCE

- The homepage provides a quotation/contact workflow rather than an independently verified booking identity.
- The site links visitors to Facebook, Instagram, YouTube, and WhatsApp channels.
- The stated business model involves paid transportation bookings and rentals, creating a direct payment-exposure point for prospective customers.

Summary Verdict

The overall posture is **critical trust risk**, driven by confirmed external reputation contradictions despite a conventional service presentation and stable page behavior. The website may represent a genuine transportation business, but that connection remains likely rather than independently verified, and the available evidence does not support treating sensitive interaction as routine.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure of the hosting environment, but they are infrastructure controls rather than evidence of legitimacy. All observed addresses were Cloudflare edge servers, and the origin server was not observable in this analysis; this limits independent infrastructure attribution and may permit rapid content changes behind the edge.

EVIDENCE

- The site resolves through Cloudflare CDN/WAF infrastructure using four observed edge addresses, all associated with AS13335.
- Hosting is identified as CLOUDFLARENET - Cloudflare, Inc., US; no likely origin address was identified.

Closing Assessment

Sensitive actions should remain on hold until the operator, applicable authorizations, payment beneficiary, and booking terms have been independently confirmed through trusted channels. Any engagement should use payment methods with meaningful dispute and recovery protections.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of limorigal.com.

- The request stayed on limorigal.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-08-03. CLEAR
- The earliest public archive of this site is from 2006-02-13. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about limorigal.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
