

Is linkbio.co safe? TrustSniffer's low-trust assessment: 40/100

linkbio.co

Verdict

40
OUT OF 100

LOW TRUST

linkbio.co is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 70%.

What this site appears to be

Marketing landing page for Linkbio, a link-in-bio SaaS targeting creators and small businesses. Describes product features (links, store, bookings, analytics), shows customer examples and app store links, and encourages signups.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.linkbio.co/en>

What linkbio.co served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a marketing landing page for Linkbio, a link-in-bio software-as-a-service platform aimed at creators and small businesses. It presents tools for aggregating social links, content, products, bookings, contact points, and analytics into a customizable mobile page, with subscription features, app-store distribution, and signup calls to action.

Scam/Impersonation Risk

The site presents a coherent SaaS proposition and its captured homepage contains no obvious phishing, credential-harvesting, or brand-impersonation language. However, this favorable page-level presentation is outweighed by confirmed external reputation contradictions: the domain is blacklisted and received two malicious detections in external security evaluation. Runtime testing also recorded two password forms, although no login form was visible in the captured landing page, creating a material discrepancy for any account-related interaction. No conflicting legal-entity names were observed, but the available evidence does not establish that the apparent Linkbio service is operated by a verified real-world entity.

EVIDENCE

- External reputation evaluation recorded 2 malicious detections and a confirmed blacklist for the domain.
- The homepage describes Linkbio's creator and business SaaS features, with no page-level red flags detected.
- Runtime telemetry recorded 2 password forms; the captured homepage separately showed no visible login form.
- Domain registration is recorded in 2022, with a reconciled domain age of approximately 5.82 years.

Regulatory Verification Notes

The apparent business model is a software service rather than a stated financial or regulated offering. The analyzed site materials contain no claimed license, licensing authority, or registration number; this is a disclosure gap requiring independent confirmation if the service processes payments, holds customer funds, or provides any regulated feature. The business identity remains unverified, and the site's professional presentation should not be treated as proof of legal ownership or regulatory standing. A valid transport certificate and mainstream hosting infrastructure support technical availability, but they do not resolve the external reputation contradiction.

EVIDENCE

- The analyzed site materials contain no license claim, licensing authority, or license number.
- The domain is recorded with Namecheap, Inc.; the registration expiration date is 2028-01-29.
- Hosted on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-28.

What to Verify Next

Before any sensitive interaction, an enterprise or prospective user should independently confirm the operating company, service terms, payment recipient, refund process, and official support channels using information obtained outside the site. If the service is used for payment collection or other regulated activity, the relevant corporate and regulatory registries should be checked directly, and any account credentials should be unique to this service. Any observed password or authentication workflow should be tested only after the operator and domain reputation have been independently resolved.

EVIDENCE

- The homepage offers signup calls to action and app-store links but does not, in the supplied evidence, independently establish the operator's legal identity.
- The site's stated functions include product promotion, lead collection, bookings, and sales-performance analytics.
- External security findings conflict with the otherwise low-risk page-content assessment and should be resolved before sensitive use.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site's coherent SaaS presentation and technically stable delivery do not offset the confirmed external reputation contradictions or the absence of independent identity verification. The evidence supports treating the service as potentially usable only in a restricted, non-sensitive context pending resolution of those contradictions.

Infrastructure Integrity

The website is protected by Cloudflare's CDN and WAF, with observed traffic terminating on Cloudflare edge infrastructure rather than an independently observable origin. This provides a mitigating layer against direct exposure of the hosting environment, but it is shared protective infrastructure and is not evidence of legitimacy.

Closing Assessment

Sensitive actions should remain suspended unless independent checks establish the operator, authentication workflow, and transaction arrangements; non-sensitive viewing is the proportionate interim posture.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of linkbio.co.

- The request stayed on linkbio.co. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-01-29. CLEAR
- The earliest public archive of this site is from 2020-10-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about linkbio.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
