

Is linklist.bio safe? TrustSniffer's low-trust assessment: 40/100

linklist.bio

Verdict

40

OUT OF 100

LOW TRUST

linklist.bio is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Landing page for Linklist, a link-in-bio SaaS offering free and paid subscription tiers, digital catalog/ecommerce features, link shortening, QR codes, analytics integrations, testimonials, and support/contact channels.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is Linklist, a SaaS platform that presents link-in-bio pages, digital catalogs, link shortening, QR-code generation, analytics integrations, and free or paid subscription plans for individuals and small businesses.

Scam/Impersonation Risk

The site presents a coherent SaaS business model and has substantial continuity indicators, including a long-established domain, extensive historical captures, strong page authority, and a high global traffic footprint. Those signals demonstrate an established online presence but do not neutralize the material contradiction that external reputation checks recorded two malicious detections and a confirmed blacklist status from two sources. No identity inconsistency or brand impersonation was observed in the supplied page analysis; nevertheless, the external detections create a significant risk for login, credential, subscription, and other sensitive interactions. The landing page itself contains a login form and subscription checkout surface, increasing the importance of treating the reputation conflict as operationally relevant rather than relying on the professional appearance of the site.

EVIDENCE

- The domain was registered on 2020-03-05 and is recorded as 6.44 years old.
- The domain has 5,000 archive snapshots spanning 2020-07-27 through 2025-11-19, with 6 years tracked.
- The homepage is a professional SaaS product-marketing page with login, signup, and subscription-checkout forms; no hidden forms or external password forms were detected.
- External reputation evaluation recorded 2 malicious detections and a confirmed blacklist indication; a separate reputation check did not report malicious status.

Regulatory Verification Notes

The available material supports an apparent software-service operation, but independent real-world operator identity is not verified. The site does not claim a financial or other regulated license, and the supplied disclosure state is unclear; this is a regulatory-transparency gap rather than, by itself, proof of fraud. The transport layer is valid but uses domain validation only, which authenticates control of the domain rather than the legal identity of the operator. A broker-specific third-party dataset produced no match, but that result is contextual and is not evidence of licensing or regulatory authorization.

EVIDENCE

- The homepage describes a subscription SaaS model and exposes pricing, support, login, signup, and checkout functionality.
- The site is served on AS13335 through CLOUDFLARENET - Cloudflare, Inc., US.
- The TLS certificate was issued by YE1 with DV validation and is valid to 2026-10-16T18:56:01+00:00.
- No license claim, license authority, or license number is recorded in the supplied site analysis.

What to Verify Next

Before any sensitive interaction, the prospective user should independently confirm the legal entity operating Linklist, the contractual party named for subscriptions, and the applicable consumer-protection or business-registration status. Payment terms, cancellation rights, refund handling, and data-processing responsibilities should be reviewed directly in the site's legal materials. Official support and contact channels should be confirmed through an independent route, and any account or payment activity should be limited until the external reputation conflict has been resolved.

EVIDENCE

- The homepage provides pricing and subscription functionality but the supplied analysis does not establish an independently verified legal operator.
- The site includes Help and support/contact pathways that can be cross-checked independently.
- The site's forms include login, signup, and subscription-checkout functions, creating identifiable points for credential and payment verification.

Summary Verdict

The overall posture is **low trust with significant sensitive-interaction risk**. The website appears operational and established, but its credible continuity signals are outweighed by confirmed external reputation contradictions. Identity remains likely rather than independently verified, so the site should not be treated as proven legitimate for sensitive use.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct origin exposure and helps absorb routine network abuse, but it is not proof of operator legitimacy. All observed addresses were CDN edge addresses, and the origin server was not observable in the analysis; this limits independent assessment of the underlying hosting environment and may permit rapid content changes behind the edge.

EVIDENCE

- The site is protected by Cloudflare CDN/WAF infrastructure.
- Four observed addresses were identified as Cloudflare edge addresses; 0 likely origin addresses were identified.
- The observed edge infrastructure is associated with AS13335 and Cloudflare, Inc., US.

Closing Assessment

Passive viewing is the proportionate permitted use case; login, credential submission, payment, and other sensitive actions should be withheld unless the independent identity, contractual, and reputation checks are satisfactorily resolved.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of linklist.bio.

- The request stayed on linklist.bio. It was not redirected to another domain.

CLEAR
- Registration is published under NameCheap, Inc..

CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers.

NOTED
- The registration is paid up to 2027-03-05.

NOTED
- The earliest public archive of this site is from 2020-07-27.

CLEAR
- It is hosted on CLOUDFLARENET, from a server in US.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about linklist.bio at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
