

Is listadasaude.com.br legit? TrustSniffer's high-trust assessment: 90/100

listadasaude.com.br

Verdict

90

OUT OF 100

HIGH TRUST

listadasaude.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Portuguese-language healthcare directory ('Lista da Saúde') listing doctors, specialists, clinics and related blog/magazine content. Includes search by city, specialty and health insurance; offers provider signup/paid profile promotion messaging and a newsletter sign-up.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

A Portuguese-language healthcare directory, “Lista da Saúde” presents searches for doctors, specialists, clinics, cities, specialties, and health-insurance coverage, alongside health blog and magazine content. Its apparent business model is to attract patients and monetize provider participation through featured profiles, listing plans, and lead-generation opportunities, with a newsletter for visitors.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there are no detected phishing, impersonation, malicious-content, or blacklist indicators, and the site’s healthcare-directory presentation is internally consistent with its stated purpose. The homepage contains substantive provider listings, professional specialty information, location data, and healthcare-related editorial content rather than high-pressure financial offers, credential-harvesting forms, or deceptive calls to action. The available reputation evidence is clean, although coverage was not complete; this supports an apparently legitimate, low-risk assessment without independently proving the real-world operator’s identity.

EVIDENCE

- Homepage: Lists doctors, dentists, specialists, clinics, locations, and professional registration references such as CRM, CRO, and RQE identifiers.
- Homepage and site navigation: Presents “Especialistas,” “Blog,” “Revistas,” “Sobre Nós,” and “Fale Conosco,” consistent with a healthcare directory and publishing model.
- Registration record: Domain registered on 2004-09-14 and approximately 21.95 years old; the record names Rodrigo Amaral Gomes, but the connection between that registrant and the operating website has not been independently verified.
- External reputation checks: No malicious or suspicious detections, phishing flag, blacklist indication, or abuse reports were recorded in the supplied results; coverage was partial.

Regulatory Verification Notes

The site appears to function as a directory and marketing channel rather than as a healthcare provider, insurer, or stated regulated financial service. Its pages show provider credentials and healthcare information, but the supplied content does not evidence a corporate registration disclosure, healthcare-directory operating entity, or regulatory license for the platform itself. This is a transparency and verification matter, not evidence of a scam. The site's established registration continuity, valid transport encryption, identified hosting, and clean available reputation provide affirmative support for an established-site interpretation, while the operator identity remains unverified.

EVIDENCE

- Homepage: Offers searches by city, specialty, and health insurance and displays provider credential references, including CRM, CRO, and RQE numbers.
- Provider-signup content: Describes paid profile promotion, listing plans, and lead-generation opportunities for medical professionals and clinics.
- Hosting infrastructure: Served from AS47583 (AS-HOSTINGER - Hostinger International Limited, CY), with infrastructure located in LT.
- Transport encryption: TLS certificate issued by YE2 with DV validation, valid to 2026-10-05.

What to Verify Next

Before credential submission or any paid provider engagement, the operating entity should be confirmed through the site's About and Contact pages and, where relevant, through an independent business registry or offline contact route. Provider credentials should be checked against the applicable Brazilian professional council, and any paid listing arrangement should be reviewed for the contracting entity, fees, renewal terms, cancellation rights, and refund conditions. For patient-facing interactions, ordinary checks of provider identity, appointment arrangements, privacy handling, and payment protection should be completed independently of the directory's promotional claims.

EVIDENCE

- About page: Confirm the legal entity responsible for the directory, its physical or registered business details, and the scope of its services.
- Contact page: Validate the official communication channels using an independent route before sharing sensitive information or arranging payment.
- Provider profiles: Independently match displayed CRM, CRO, and RQE references with the relevant professional councils.
- Listing and promotional pages: Review pricing, renewal, cancellation, refund, and data-handling terms before purchasing a featured profile or related service.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The principal qualification is that the real-world operator identity is not independently verified, so the classification supports normal informational use while preserving ordinary commercial and identity checks for sensitive engagements.

Infrastructure Integrity

The site resolves to two likely origin addresses, with no CDN vendor or edge-IP layer identified in the supplied infrastructure results. Hosting is provided through Hostinger International Limited's AS47583 infrastructure; this is a conventional operational signal and a limited mitigating factor, not proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before submitting credentials or making payments, independent checks of the contracting entity, relevant provider credentials, applicable terms, and payment protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of listadasaude.com.br.

- The request stayed on listadasaude.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-14. NOTED
- The earliest public archive of this site is from 2007-04-30. CLEAR
- It is hosted on AS-HOSTINGER, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about listadasaude.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
