Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the corporate website of Livingcolour Corporation (リビングカラーコーポレーション), a Kansai-based Japanese real-estate company presenting its condominium and newly built housing sales activities, company information, project history, access details, and contact channels.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate real-estate purpose, identifies a specific company, and provides company, history, access, privacy, and contact content rather than deceptive investment, credential-harvesting, or impersonation material. The available technical and reputation signals do not indicate phishing, malicious activity, or brand impersonation; however, the real-world operator has not been independently verified, so the legitimacy assessment remains evidence-consistent rather than conclusive.

EVIDENCE

- The homepage identifies Livingcolour Corporation and describes its business as residential property sales in the Kansai region.
- The site's company-information and project-history pages present a continuous portfolio of condominium and housing activity.
- The domain was registered on 2006-02-21 and is recorded as 20.51 years old.
- Historical records contain 43 archive snapshots spanning 2008–2025, with 18 years tracked.

Regulatory Verification Notes

The legal and identity content is reasonably substantive, including company information, corporate history, an access map, privacy information, and published address and telephone details. No license or registration number is presented in the supplied site content, leaving regulatory status and the precise contracting entity for independent confirmation; this is a disclosure and verification gap, not evidence of fraudulent conduct. No adverse broker-dataset match was supplied, and the overall evidence remains consistent with an established, apparently legitimate corporate website.

EVIDENCE

- The company-information, history, access, privacy, and contact pages are present as distinct corporate disclosures.
- The site's published title identifies “株式会社リビングカラーコーポレーション” as the operator presented to visitors.
- The site resolves through AS7506, operated by GMO-I-R1 - GMO Internet, Inc., JP.
- TLS uses issuer YR1 with DV validation and is valid to 2026-10-17T03:23:01+00:00.

What to Verify Next

Before credentials or payment interactions, an independent party should confirm the contracting entity and any property-sector authorization through the applicable official registry, review the transaction's cancellation, refund, and payment-protection terms, and validate the published contact channels through an independently sourced route. These checks are proportionate to the unresolved operator-identification question and the commercial significance of real-estate transactions.

EVIDENCE

- The captured homepage contains no login form.
- The captured homepage contains no sensitive-data form.
- The site presents dedicated company-information and access/contact pages that can be cross-checked against independent records.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradictions. The principal qualification is that the real-world operator identity is not independently verified.

Infrastructure Integrity

The site is served from a single directly resolved hosting address, with no CDN or WAF detected. This conventional hosting arrangement provides limited infrastructure-layer mitigation but does not, by itself, indicate malicious activity.

EVIDENCE

- DNS resolution returned one unique IP address: 157.7.44.232.
- No edge IPs or detected CDN vendors were recorded.
- The resolved infrastructure is located in Japan.

Closing Assessment

Normal browsing is proportionate to the assessment, while independent counterparty, transaction-document, and payment-protection checks should precede credential submission or financially binding activity.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of livingcolour.co.jp.

- The request stayed on livingcolour.co.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by heteml.jp, across 2 name servers. NOTED
- The earliest public archive of this site is from 2008-01-10. CLEAR
- It is hosted on GMO-I-R1, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about livingcolour.co.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
