- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Lloyds Bank's website presents consumer, business, corporate, and private Internet Banking access, supported by customer-service contacts, legal information, and links to the institution's banking portals. Its apparent business model is established financial services sustained through deposits, lending, account fees, and related products.

Scam/Impersonation Risk

No contradictions were observed. The banking error page uses coherent Lloyds Bank branding, provides normal portal navigation and telephone support, contains no credential form or untrusted submission destination, and shows no phishing or brand-impersonation indicators. Clean external reputation findings and sustained historical continuity further support the conclusion that this is the established institution's website.

- The Internet Banking error page provides links to Internet Banking, Online for Business, Corporate Online, and Private Internet Banking, with no sensitive form present.
- The domain was registered on 1994-06-21 and is approximately 32.13 years old; the registrar is CSC Corporate Domains, Inc.
- Historical records contain 4,737 snapshots spanning 2013–2026, covering 14 tracked years with a maximum gap of 1 year.

Regulatory Verification Notes

The site links to legal, privacy, security, rates-and-charges, and Lloyds Banking Group information, which is consistent with a mature banking operation. The reviewed material does not itself state a license number or specific regulatory authorization, so authorization should be confirmed through the relevant official register as a routine transparency check. This is a verification matter, not evidence of impersonation or fraud.

- The error page exposes legal, privacy, security, and rates-and-charges links.
- The site's hosting resolves to AS396982, Google-Cloud-Platform / Google LLC, US.
- Its TLS certificate is EV-validated, issued by DigiCert EV RSA CA G2 for Lloyds Banking Group PLC, and valid through 2027-02-07.

What to Verify Next

For institutional onboarding or other regulated use, confirm the relevant current authorization and entity details through the applicable official financial-services register, and independently validate support contact channels using information published through the institution's primary corporate materials.

- The page provides dedicated personal and business telephone support routes, including international contact numbers.

- The page identifies Lloyds Banking Group and links to its legal and security information.

Summary Verdict

The website presents a high-trust posture consistent with a legitimate, established banking institution. Its identity, long-term continuity, technical controls, page content, and external reputation converge without contradictory signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is hosted by Google Cloud Platform on AS396982, with no CDN detected and two likely origin addresses identified. The hosting environment is a mitigating infrastructure signal, but it is supporting context rather than proof of legitimacy.

Closing Assessment

Standard account access and ordinary banking interactions are appropriate; regulated or high-value institutional engagement should follow normal authorization and counterparty-verification procedures.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lloydsbank.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
