Full analysis

Overview

Local Value Magazine is a WordPress-powered, multi-topic editorial blog presenting articles across automotive, business, lifestyle, technology, health, travel, reviews, and other consumer-interest categories. Its apparent business model is informational publishing supported by advertising, affiliate relationships, and sponsored content rather than product sales or user-deposit financial services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a conventional magazine structure with category navigation, dated editorial posts, archives, and no login form, credential-collection workflow, financial-service offer, or apparent brand-impersonation pattern. The domain also shows sustained historical continuity rather than evidence of suspicious repurposing, supporting an established-site interpretation while not independently proving the operator's real-world identity.

EVIDENCE

- The homepage identifies “Local Value Magazine” and displays editorial categories including Auto, Business, Entertainment, Fashion, Health, Technology and Gadgets, and Tours and Travels.
- The homepage contains no sensitive form, password field, wallet-connection flow, or hidden form; behavioral review recorded no cloaking, clipboard hijacking, wallet-drainer activity, or password submission to an external destination.
- Domain registration: 2017-09-07 (~8.96 years old).
- Web archive: 242 snapshots spanning 2006–2026 (21 years tracked).

Regulatory Verification Notes

The site appears to operate as an informational publication, not as a broker, payment service, investment platform, or other regulated financial business. No regulated-service licensing claim or license number is evidenced on the reviewed pages, which is a minor disclosure gap rather than an indication of deception in this context. The publisher’s real-world identity remains unverified, so the site’s apparent legitimacy should not be treated as proof of a particular company or individual; registration through NAMECHEAP INC and use of a privacy service are administrative details. No adverse broker match was identified.

EVIDENCE

- The homepage describes the publication as “A Blog About Multiple Topics” and presents editorial posts rather than account, deposit, trading, or purchase workflows.
- Domain registration is recorded through NAMECHEAP INC, with the organization listed as “Privacy service provided by Withheld for Privacy ehf.”
- Hosting: AS54489, CORESPACE-DAL - CoreSpace, Inc., US.
- TLS certificate: issuer YR1, DV validation, valid to 2026-10-26T09:38:44+00:00.

What to Verify Next

Before any future interaction involving credentials, payment, sponsorship, or a commercial proposal, independently confirm the publisher’s legal identity and contact channels through an offline or separately sourced business record. If the site later introduces regulated services, confirm the stated operator and licensing status directly with the relevant regulator before relying on those claims. For any purchase or paid arrangement, confirm return, refund, dispute, and payment-protection terms independently.

EVIDENCE

- The reviewed homepage contains no account-registration, login, purchase, or user-deposit workflow requiring immediate transaction approval.
- The site’s stated content model is editorial publishing with possible advertising, affiliate, and sponsorship monetization.
- The reviewed content includes no license authority, registration number, or regulated-service claim requiring validation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk informational website. The absence of observed phishing, impersonation, blacklist, or other contradictory signals supports a high-trust posture, while the operator’s independent real-world identity remains unverified.

Infrastructure Integrity

The site resolves to a directly hosted CoreSpace environment in the United States, with no CDN edge identified in the supplied infrastructure posture. Its transport encryption is supported by a valid DV certificate, providing basic connection protection; this infrastructure is a mitigating technical signal, not proof of publisher identity.

Closing Assessment

Normal browsing is proportionate to the observed posture, with ordinary independent identity, commercial-terms, and payment-protection checks appropriate before any future credentialed or paid interaction.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about localvaluemagazine.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
