Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an official-looking corporate portal for ООО «ЛокоТех» (LokoTech), presenting locomotive maintenance, repair, modernization, leasing, parts production, company news, branch geography, careers, governance, and contact functions. Its apparent business model is business-to-business service contracting with rail operators and related leasing and supply arrangements; the homepage also presents scale claims including 15,000 locomotives serviced annually, 88 service depots, and 36,000 employees.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing or impersonation indicators, no conflicting legal identities, and no malicious or suspicious external detections. The site behaves as a conventional corporate information service, with no login form, hidden sensitive form, wallet interaction, or suspicious script activity identified. The long-established domain, meaningful global traffic footprint, and clean external reputation are consistent with an established website, although they do not independently verify the real-world operator. Evidence:

- The homepage is classified as a corporate/company site and presents company profile, business services, news, careers, branches, governance, and contact content.
- The site's domain registration record shows registration on 2012-05-14, with an age of 14.25 years.
- External reputation checks recorded 0 malicious and 0 suspicious detections; the site has a global traffic rank of 26,658 and is within the top 1 million domains.
- Behavioral inspection recorded no login form, hidden form, wallet connection, clipboard manipulation, cloaking, or suspicious inline scripts.

Regulatory Verification Notes

The legal and identity material presents ООО «ЛокоТех» as the corporate entity and includes sections for management, corporate governance, anti-corruption, company history, branches, and contacts. Available evidence is therefore consistent with an established corporate presence, but the operator's real-world identity is not independently verified. The site does not present a license number or regulated-service authorization; given the described industrial B2B activities, this is a disclosure and applicability point for independent confirmation rather than evidence of misconduct. Evidence:

- The site's company pages include "History of Development," "Management," "Corporate Governance," "Anti-Corruption," "Branches," and "Contacts" sections.
- The registration record identifies RU-CENTER-RU as registrar.

- The site is served from AS49063, DTLN - Data Storage Center JSC, RU.
- Transport security uses an OV certificate issued by GlobalSign RSA OV SSL CA 2018, valid to 2026-10-25.

What to Verify Next

Before credentials, contracting, or payment interactions, an interested counterparty should independently confirm the named company and its authority to enter the relevant commercial arrangement through an official corporate registry or established industry contact. The contracting entity, beneficiary details, payment instructions, and any applicable sector or procurement requirements should be matched against independently obtained records rather than relying solely on site content. Contact channels should also be confirmed through an offline or independently sourced route before sensitive information is exchanged. Evidence:

- The site provides dedicated company, governance, branch, and contact pages that can be compared with independently sourced corporate records.
- The homepage describes service contracts, leasing, supply, repair, and modernization activities, creating a need to confirm the precise contracting entity for any proposed transaction.
- The site contains one contact form and no sensitive form was detected during technical inspection.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate corporate website. The classification is strong, while the connection between the website and a independently verified real-world operator remains unresolved.

Infrastructure Integrity

The site resolves to one likely origin IP, 185.98.80.185, with no CDN detected and no edge-IP layer identified. This direct hosting arrangement is a technical characteristic rather than an adverse legitimacy finding; the observed infrastructure was resolved consistently to DTLN - Data Storage Center JSC in Russia.

Closing Assessment

Normal informational use is proportionate to the assessed posture; before submitting credentials or making payments, ordinary independent checks of the counterparty, transaction terms, and payment protections should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of locotech.ru.

- The request stayed on locotech.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 4 name servers. NOTED
- The registration is paid up to 2027-05-14. NOTED
- It is hosted on DTLN, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about locotech.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
