Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Lógica Ideal is a Brazilian SaaS provider presenting cloud-based CRM, real-estate portal, and rental-management systems for real-estate agencies, with product demonstrations, contact options, and a stated Bauru, São Paulo presence.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage describes a coherent commercial software model, including CRM/site management, property listings, cloud dashboards, integrations, and rental administration; it provides demonstration and contact calls to action rather than financial, credential-harvesting, or wallet-interaction features. An isolated, unconfirmed external detection does not establish malicious activity and is outweighed by the broader benign evidence.

- The homepage identifies CRM/site, property-portal, and rental-management products and presents a commercial contact workflow.
- The homepage contains one contact form with no sensitive fields and no login or password form.
- External checks recorded no Google Safe Browsing, blacklist, or abuse reports, while the domain is listed within the global top-million traffic range.

Regulatory Verification Notes

The available site content supports a conventional software-services business rather than a regulated financial offering. No license or regulatory registration is claimed in the supplied content, so regulated status is not established; this is a transparency point for procurement or contractual due diligence, not evidence of deception. The registration record identifies DORIVAL AMORIM SILVA BAR BAURU - ME, while the site presents a Bauru, São Paulo business address. Transport and hosting telemetry are consistent with a functioning established website.

- The domain was registered on 2008-01-02 and is 18.59 years old.
- The site is hosted on AS16276, OVH - OVH SAS, FR.
- TLS uses issuer YR2 with DV validation and is valid through 2026-10-03.
- The homepage states that its systems are cloud-accessible and provides business contact details, including telephone, email, WhatsApp, and address information.

What to Verify Next

Before a formal supplier relationship, the prospective counterparty should confirm the contracting entity and any applicable business or software-service registrations through the relevant Brazilian registry, and independently validate the published contact channels using an offline or separately sourced business record.

- The homepage supplies the business name, product names, contact channels, and Bauru, São Paulo address for independent confirmation.
- The homepage offers a product demonstration, providing a practical route to validate service scope and contracting details.
- The supplied content contains no license number or regulatory authorization claim to validate.

Summary Verdict

The website presents as a legitimate, established, and trustworthy commercial SaaS provider with no observed scam or impersonation contradiction. Normal interaction, including account login and standard use, is appropriate within the ordinary expectations of a business software service.

Infrastructure Integrity

The site benefits from CDN/WAF protection, with observed traffic handled through edge infrastructure and no origin candidate exposed in the analysis. This reduces direct origin exposure and is a mitigating security characteristic, though it is not independently proof of legitimacy.

Closing Assessment

Standard business engagement is appropriate, with entity and contractual checks completed as part of normal enterprise onboarding.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of logicaideal.com.br.

- The request stayed on logicaideal.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 211.148, across 2 name servers. NOTED
- The registration is paid up to 2027-01-02. NOTED

- It is hosted on OVH, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about logicaideal.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
