The page as captured

https://lorletteandwill.com/

What lorletteandwill.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Lorlette & Will is an editorial lifestyle and entertainment website presenting article listings on entertainment, relationships, news, and general lifestyle topics, with an apparent content-publishing model potentially supported by advertising, sponsorship, or affiliate activity.

Scam/Impersonation Risk

The site's homepage presents a conventional editorial format and does not show login, payment, investment, or other sensitive-interaction features; no direct brand impersonation or phishing form was identified in the page review. Nevertheless, the domain has a **confirmed blacklist presence** and was assessed as malicious by multiple external security detections, including two major security vendors. This is a material contradiction to the benign appearance of the homepage. Suspicious inline scripts and a high volume of browser console errors add technical concern, although the observed behavior did not include credential forms, wallet connection, clipboard manipulation, or external data submissions. No identity contradiction was observed because the supplied pages do not present conflicting legal-entity names.

EVIDENCE

- Homepage: editorial navigation and article listings for entertainment, relationships, lifestyle, and news; no login or payment form observed.
- External reputation artifact: 15 malicious detections from 20 evaluated results; blacklist status confirmed; two Tier-1 security vendors flagged the domain.
- Browser behavior: 2 suspicious inline scripts and 18 console errors across 2 successful runs; no hidden sensitive forms or external POST activity observed.
- Domain registration: registered 2015-04-27 (~11.32 years old) through Squarespace Domains II LLC.

Regulatory Verification Notes

The available content supports an editorial rather than financial-services business model, and no evidence indicates deposit-taking, investment solicitation, or regulated brokerage activity. The supplied site navigation includes About and Contact pages, but no licensing claim, registration number, or clearly identified regulated operator is evidenced in the reviewed material; this is a transparency gap for formal identity and regulatory verification, not by itself evidence of a scam. The real-world operator remains independently unverified. The confirmed external blacklist signal should be treated as a serious reputational issue rather than as a licensing determination.

EVIDENCE

- Site pages: About and Contact navigation is present; no license authority or registration number is shown in the supplied page content.
- Domain provenance: archive record shows 0 snapshots, with records dated 2018-08-07 through 2021-12-13 and 4 years tracked.
- Hosting telemetry: served from AS23470 (RELIABLESITE - ReliableSite.Net LLC, US).
- Transport security: TLS certificate issued by ZeroSSL ECC DV SSL CA 2 at DV validation level, valid to 2026-10-01.

What to Verify Next

Before any activity beyond passive reading, an organization should obtain an independent security disposition for the domain and confirm that the current destination remains consistent with the stated editorial purpose. Any future request for credentials, downloads, payment details, or other sensitive information should be validated through an independently sourced contact route and, where applicable, checked against the relevant legal or regulatory registry. Contact-channel authenticity should be confirmed through an offline or independently verified route rather than relying solely on the website.

EVIDENCE

- Homepage: the observed site purpose is informational publishing, without a sensitive interaction surface.
- Browser behavior: no credential form, wallet connection, clipboard write, or external POST activity was observed during testing.
- External reputation artifact: the domain remains associated with a confirmed blacklist signal and multiple malicious detections.

Summary Verdict

The overall posture is **critical trust risk**, with sensitive interaction risk elevated to a level unsuitable for credentials, financial information, or other consequential activity. The site's apparently ordinary editorial presentation does not overcome the contradictory external threat evidence, and the operator's real-world identity is not independently verified.

Infrastructure Integrity

The site resolves to a single likely origin address hosted by ReliableSite.Net LLC in the United States on AS23470, with no CDN detected. This infrastructure provides a clear hosting attribution but offers no basis for treating the site as legitimate; infrastructure context cannot offset the external reputation contradiction.

Closing Assessment

Prospective users and institutions should restrict activity to passive reading until independent security, destination, and operator checks produce a satisfactory disposition, and should avoid credential or financial interactions in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lorletteandwill.com.

- The request stayed on lorletteandwill.com. It was not redirected to another domain. CLEAR
- Registration is published under Squarespace Domains II LLC. CLEAR
- DNS for this domain is served by digitalocean.com, across 3 name servers. NOTED
- The registration is paid up to 2027-04-27. NOTED
- The earliest public archive of this site is from 2018-08-07. CLEAR
- It is hosted on RELIABLESITE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lorletteandwill.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
